

Dynamic Charge Acceptance of Lead-Acid Batteries for Micro-Hybrid Automotive Applications

Von der Fakultät für Elektrotechnik und Informationstechnik
der Rheinisch-Westfälischen Technischen Hochschule Aachen
zur Erlangung des akademischen Grades einer
Doktorin der Ingenieurwissenschaften genehmigte Dissertation

vorgelegt von

Diplom-Ingenieurin

Heide Budde-Meiwes

aus Aachen

Berichter:

Universtitätsprofessor Dr. rer. nat. Dirk Uwe Sauer
Universtätsprofessor Dr.-Ing. habil. Dr. h. c. Kay Hameyer

Tag der mündlichen Prüfung: 2. März 2016

Heide Budde-Meiwes

**Dynamic Charge Acceptance of Lead-Acid Batteries
for Micro-Hybrid Automotive Applications**

Contents

1	INTRODUCTION AND MOTIVATION.....	1
1.1	“Why still lead-acid?”.....	1
1.2	Demands on lead-acid batteries in automotive applications.....	2
1.3	Motivation.....	3
2	LEAD-ACID BATTERIES FOR AUTOMOTIVE APPLICATIONS	5
2.1	Chemical reactions.....	5
2.1.1	Main reactions.....	5
2.1.2	Gassing.....	6
2.2	Working principle, design and application.....	7
2.2.1	Construction.....	7
2.2.2	Flooded and valve-regulated lead-acid batteries.....	9
2.2.3	Fields of application.....	10
2.3	Ageing effects and factors accelerating ageing.....	13
2.3.1	Acid stratification.....	13
2.3.2	Corrosion.....	15
2.3.3	Erosion of positive active material.....	15
2.3.4	Sulphation.....	16
2.3.5	Short-circuits.....	17
3	ASPECTS ON DYNAMIC CHARGE ACCEPTANCE.....	18
3.1	Definition of dynamic charge acceptance.....	18
3.2	Brake energy recuperation.....	19
3.3	Measurement methods.....	22
3.4	Dynamic charge acceptance – electrical and structural analysis.....	23
3.4.1	Influences on DCA.....	23
3.4.2	Refresh for DCA.....	25
3.4.3	Positive and negative plates studied under microscope.....	26
3.4.4	Additives to the negative and the positive electrode.....	27
3.5	Theories and modelling of charge acceptance.....	29
3.5.1	Theories on processes and limitations of DCA.....	29
3.5.2	Model approaches for discharge and charge reaction.....	32
4	MICROSCOPIC ANALYSIS OF LEAD-ACID ELECTRODES CONSIDERING DYNAMIC CHARGE ACCEPTANCE.....	39

4.1	Laser scanning microscope - possibilities and limitations	41
4.2	Preparation technique for optical analysis	44
4.2.1	Washing duration	44
4.2.2	Drying process	45
4.3	Application of the proposed preparation technique	47
4.3.1	Charged and discharged electrodes.....	47
4.3.2	Aged electrodes.....	51
4.4	Influence of discharge current rate.....	52
4.5	Short-term history - charge and discharge	55
4.6	Comparing battery in new state and after DCA test	59
4.7	Comparing battery in new state and from field operation	62
4.8	Conclusion	66
5	ELECTRICAL CHARACTERISTICS OF DYNAMIC CHARGE ACCEPTANCE	68
5.1	DCA measurement in vehicle	70
5.2	DCA in simulated real world test.....	71
5.3	Laboratory tests on DCA	77
5.3.1	Short-term history – charge and discharge	78
5.3.2	Short-term history – rest periods.....	85
5.3.3	Short-term history - various discharge currents.....	86
5.3.4	Acid stratification.....	87
5.3.5	State of charge.....	89
5.3.6	Temperature	90
5.3.7	Single electrode polarisation.....	92
5.3.8	Voltage limitation	96
5.3.9	Comparison of battery types	97
5.4	Proposal for standardised DCA test.....	99
5.4.1	Non-accelerated test.....	99
5.4.2	Short-term test.....	100
5.4.3	Correlation of non-accelerated and short test	102
5.5	Conclusion	105
6	MODELLING OF DYNAMIC CHARGE ACCEPTANCE	107
6.1	Consideration for modelling of DCA.....	107
6.2	Comparing model approaches from literature with experimental evidence	109
6.3	Impedance-based modelling	111
6.3.1	Modelling using electrical equivalent circuit approach	111
6.3.2	Limiting and secondary processes	114
6.4	DCA modelling approach	115
6.4.1	Crystal size distribution	115
6.4.2	Implementation of crystal size distribution.....	116
6.5	DCA modelling results.....	125
6.5.1	Short-term charge and discharge history	125

6.5.2	Recrystallisation during rest period	126
6.5.3	Temperature dependency	127
6.5.4	Single electrode polarisation	128
6.5.5	State of charge	128
6.6	Conclusion	129
7	SUMMARY	132
8	BIBLIOGRAPHY	134
9	APPENDIX	146
9.1	Abbreviations	146
9.2	Laboratory tests	148
9.2.1	Conditioning	148
9.2.2	Testing profiles	150
9.3	Summary (in German)	152
9.4	Acknowledgement (in German)	154
9.5	Curriculum Vitae (in German)	156
