This booklet reviews part of a 5 years work at the Applied Technology Department  
Advanced Fillers

The author would like to thank the colleagues in the Applied Technology Department for the contribution of several unpublished results and the fruitful discussions during its preparation. I like to thank Mrs. Prof. Thorn-Csányi and Mr. Brocke for performing the metathetical degradation of the rubber samples.

The author especially likes to thank Dr. Stober and Mr. Schwaiger for their support during the last 5 years for applied research.

Special thanks also to Degussa AG for the permission to prepare and publish this booklet.
