

EMPIRICAL STUDIES ON EXCHANGE RATE POLICIES IN TRANSITION ECONOMIES

Inaugural Dissertation
zur Erlangung des Grades eines Doktors
der Wirtschafts- und Gesellschaftswissenschaften

durch die
Rechts- und Staatswissenschaftliche Fakultät
der
Rheinischen Friedrich-Wilhelms-Universität Bonn

Vorgelegt von

Jizhong Zhou

aus Shanghai, Volksrepublik China

März 2002, Bonn

Dekan: Prof. Dr. Georg Nöldeke

1. Prüfer: Prof. Dr. Jürgen von Hagen

2. Prüfer: Prof. Dr. Manfred J.M. Neumann

Tag der mündlichen Prüfung: 21.03.2002

Gedruckt mit Unterstützung des

Deutschen Akademischen Austauschdienstes

Acknowledgements

This dissertation presents the main results of my four-year Ph.D. study at Center for European Integration Studies (ZEI), University of Bonn. Many people have contributed in one way or another to the accomplishment of this study. The most prominent among them is my supervisor, Prof. Dr. Jürgen von Hagen. He provided me a friendly environment for research, guided me through each stage of the study, and wrote strong recommendation letters when I applied for financial support. I am deeply indebted to him for his excellent supervision on my research work and kind help to my life in Bonn.

I also owe gratitude to Prof. Dr. Manfred J.M. Neumann, not only for his willingness to read this dissertation, but also for his assistance to my application for scholarship. With his letter of recommendation, as well as those from Prof. Dr. Peter Schönfeld and from my supervisor, my application for scholarship were successful. I am grateful to these professors.

I would like to thank *Deutscher Akademischer Austauschdienst* (DAAD) for granting me an annual scholarship in 1998, which was renewed subsequently in 1999, 2000, and 2001. Without the DAAD scholarship, it is less likely that I would go to Germany to pursue my Ph.D. study.

My thanks also go to numerous friends in Bonn and colleagues at ZEI. Particularly, I would like to thank Xiaodong Gong, who provided me many insightful suggestions on the econometric techniques used in my research. I would also like to thank Tai-kuang Ho, Matthias Brückner, and Jan Fidrmuc for their discussions, comments, and critics, and Holger Gleich and Boris Hofman for their useful information on various issues.

Finally, and most importantly, I am grateful to my wife for her essential moral support and endless patience through all these years. My gratitude to her is beyond any words. I dedicate this dissertation to her.

Jizhong Zhou

Contents

Acknowledgements	v
1 General Introduction	1
1.1 Overview of Exchange Rate Policies	2
1.1.1 The Choice of Exchange Rate Regimes	3
1.1.2 Capital Account Liberalization and Exchange Rate Policies	6
1.2 Structure of the Dissertation	9
1.2.1 Exchange Rate Regimes: Classification and Evolution . . .	9
1.2.2 Determination of Official Exchange Rate Regimes	10
1.2.3 Determination of De Facto Regimes and Regime Discrepancies	11
1.2.4 Capital Controls and Exchange Rate Regime Choices . . .	12
2 Exchange Rate Regimes in Transition Economies: Classification and Evolution	15
2.1 Introduction	15
2.2 Classification of Exchange Rate Regimes	16
2.2.1 The IMF Classification	16
2.2.2 De Facto Classification	21
2.3 Comparisons Between Classifications	25
2.3.1 Exploring the Middle Ground	26
2.3.2 Words versus Deeds	28
2.3.3 Global and Regional Standards for Regime Classifications .	31
2.4 Evolution of Exchange Rate Regimes	34
2.4.1 Changing Patterns of Exchange Rate Regimes	35
2.4.2 Gaps Between Official and De Facto Exchange Rate Regimes	38
2.4.3 The Relevance of the “Hollowing-Out” Hypothesis	40
2.5 Conclusions	46
2.A Appendix: Cluster Analysis	48

3	The Choice of Official Exchange Rate Regimes in Transition Economies: An Empirical Analysis	51
3.1	Introduction	51
3.2	Determinants of Regime Choicess	53
3.3	Model and Data for Empirical Analysis	57
3.3.1	The Model	57
3.3.2	The Data	59
3.4	Empirical Results and Discussions	61
3.4.1	Static Choice Model	61
3.4.2	Static Choice Model with Interactive Dummy for the CIS	63
3.4.3	Dynamic Choice Model	66
3.4.4	Dynamic Choice Model for the Non-CIS Sample	69
3.5	Conclusions	70
3.A	Appendix: Results with Alternative Classification	73
4	Fear of Floating and the Choice of De Facto Exchange Rate Regimes	75
4.1	Introduction	75
4.2	Fear of Floating and Fear of Pegging	76
4.2.1	Identification of regime discrepancies	77
4.2.2	Lack of credibility and optimal exchange rate policies	81
4.2.3	Determinants of de facto regimes and regime discrepancies	83
4.3	The Joint Determination of Two Regimes	86
4.3.1	A bivariate probit model for joint regime determinations	86
4.3.2	Dependent and explanatory variables	87
4.3.3	Empirical results and discussions	89
4.4	The Determination of Regime Discrepancies	94
4.4.1	A univariate probit model for regime discrepancies	94
4.4.2	Empirical results and discussions	97
4.5	Conclusions	101
4.A	Appendix I: Likelihood Expressions	103
4.B	Appendix II: Results with LYS's Classification	104
5	The Determination of Capital Controls: Which Role Do Exchange Rate Regimes Play?	107
5.1	Introduction	107
5.2	Theoretical Arguments for Capital Controls	109
5.2.1	Preexistence of Distortions and Second-best Arguments	109
5.2.2	Multiple Equilibria and First-Best Arguments	111
5.2.3	Political Economy of Capital Controls	112

5.3	Measurement and Determinants of Capital Controls	114
5.3.1	Measuring Capital Controls	114
5.3.2	Determinants of Capital Controls	117
5.4	A Simultaneous Equations Model	121
5.4.1	The Model and the Estimation Procedure	121
5.4.2	The Explanatory Variables	123
5.4.3	Empirical Results with Official Regime Classifications	124
5.4.4	Empirical Results with De Facto Regime Classifications	128
5.5	A Single Equation Model	130
5.5.1	Three Specifications of the Model	130
5.5.2	Results of Empirical Estimations	131
5.6	Conclusions	135
5.A	Appendix I: Logical Consistency	137
5.B	Appendix II: Two-Stage Estimation Procedures	138
6	Concluding Remarks	141
6.1	Main Findings	141
6.2	Directions for Further Research	142
A	Exchange Rate Regime Classifications	145
A.1	Old IMF Classification	146
A.2	New IMF Classification	147
A.3	LYS's De Facto Classification	148
A.4	Author's De Facto Classification	149
B	Definitions of Variables and Data Sources	151
B.1	Dependent Variables	151
B.1.1	Official Exchange Rate Regimes	151
B.1.2	De Facto Exchange Rate Regimes	151
B.1.3	Capital Controls	152
B.2	Explanatory Variables	152
