

**A study on the exchange of
volatile organic compounds (VOCs) between lichens
and the atmosphere**

DISSERTATION
zur Erlangung des Grades
„Doktor
der Naturwissenschaften“

am Fachbereich Biologie
der Johannes Gutenberg-Universität
in Mainz

Burkhard Wilske
geboren in Solingen

Mainz, Dezember 2000

Dekan : Prof. Dr. J. Markl

1. Berichterstatter : Prof. Dr. J. Kesselmeier

2. Berichterstatter : Prof. J. Kadereit

Tag der mündlichen Prüfung : 21.02.2001

CONTENTS

1 INTRODUCTION	1
1.1 General aspects of volatile organic compounds (VOCs) in the atmosphere	1
1.2 The biogenic share of the VOC budget of the atmosphere	3
1.3 Why now targeting the cryptic lichens for the issue of the atmospheric VOC budget?	9
1.4 Objectives	11
2 MATERIALS AND METHODS	12
2.1 Species investigated	12
2.1.1 Selected epiphytic and terricolous lichens of the boreal zone	12
2.1.2 Lichen storage and preparation	15
2.1.3 The abundant boreal bryophyte <i>Pleurozium schreberi</i>	16
2.2 Methods	17
2.2.1 Setup of the laboratory cuvette experiments	17
2.2.2 Sampling and analyses of formic acid and acetic acid	22
2.2.3 Sampling and analyses of formaldehyde, acetaldehyde, and acetone	25
2.2.4 Sampling and analyses of other BVOCs by means of additional techniques	28
2.3 Calculations and error estimation	30
2.3.1 Calculations	30
2.3.2 Error estimation	32
3 RESULTS	34
3.1 The exchange of formic acid and acetic acid between lichens and the atmosphere	34
3.2 The exchange of the carbonyl compounds formaldehyde, acetaldehyde and acetone between lichens and the atmosphere	42

3.2.1	The exchange of acetaldehyde between lichens and the atmosphere	44
3.2.1.1	Experiments on the exchange of acetaldehyde under conditions of purified ambient air	44
3.2.1.2	Experiments on the exchange of acetaldehyde using synthetic air and anoxic conditions	47
3.2.1.3	Experiments on the co-emission of acetaldehyde and ethanol using a Proton-Transfer-Reaction Mass Spectrometer (PTR-MS)	58
3.2.2	The exchange of acetone between lichens and the atmosphere	66
3.3	The exchange of other biogenic or biogenic oxygenated VOCs by lichens	73
3.3.1	The exchange of methanol	74
3.3.2	The exchange of 1-octen-3-ol	79
3.3.3	The exchange of 1-penten-3-ol	80
3.3.4	The exchange of hexanal	82
3.3.5	The exchange of isoprenoids	83
3.4	The VOC exchange of the moss <i>Pleurozium schreberi</i>	85
3.4.1	Experiments on the exchange of acetaldehyde by the bryophyte	85
3.4.2	The exchange of higher biogenic VOCs by the bryophyte	88
4	DISCUSSION	90
4.1	The deposition of formic acid and acetic acid to the lichen thallus	90
4.2	The emission of acetaldehyde from lichens	96
4.2.1	The emission of acetaldehyde from the lichen thallus due to temporary intrathalline oxygen deficiency caused by high thallus water content	96
4.2.2	Comprehensive comparison of the acetaldehyde emission from lichens with the respective emissions from other vegetation	109
4.2.3	Evidence for the occurrence of ethanolic fermentation in the lichen thallus	111
4.3	The emission of other biogenic VOCs by lichens	113

4.4	The VOC emissions from the bryophyte <i>Pleurozium schreberi</i> with particular respect to a fungal contamination potentially recurring each year	121
4.5	Estimates on the VOC contribution of boreal lichens	124
4.5.1	Valuation of lichen distribution and extraction of biomass data from the literature	124
4.5.2	Combining the biomass and the exchange rates	149
4.6	Hypothesis on implications of the observed acetaldehyde / ethanol co-emission for the lichen symbiosis	154
5	SUMMARY	161
6	BIBLIOGRAPHY	164
7	APPENDICES	192
7.1	Abbreviations	192
7.2	Intercomparison of PTR-MS and HPLC measurements: Exchange of acetaldehyde by lichens	194
7.3	Project cooperations supporting the objectives of the BVOC screening on lichens	195
7.4	List of chemicals and devices	195
7.4.1	Materials and devices	195
7.4.2	Chemicals	197
