

# **Allyl Compounds of Main Group Metals: Coordination, Reactivity, and Catalytic Application**

Von der Fakultät für Mathematik, Informatik und Naturwissenschaften der  
RWTH Aachen University  
zur Erlangung des akademischen Grades eines  
Doktors der Naturwissenschaften genehmigte Dissertation

**vorgelegt von**

**Diplom-Chemiker  
Crispin Lichtenberg**

**aus**

**Bremen, Deutschland**

Berichter: Universitätsprofessor Dr. rer. nat. J. Okuda  
Professor Dr. rer. nat. U. Englert

Tag der mündlichen Prüfung: 26.02.2013

Berichte aus der Chemie

**Crispin Lichtenberg**

**Allyl Compounds of Main Group Metals**

Coordination, Reactivity, and Catalytic Application

Shaker Verlag  
Aachen 2013

# Acknowledgements

I would like to thank my supervisor, Prof. Dr. Jun Okuda, for his constant scientific guidance and support, for effective work on manuscripts as well as for providing a challenging research project and excellent working conditions.

Furthermore, I would like to thank Prof. Dr. Ulli Englert for being the second examiner and for contributing to this work, especially with his crystallographic expertise including in situ crystallizations.

I would like to express my gratitude to Prof. Dr. Markus Albrecht and Prof. Dr. Marcel Liauw, who accepted to act as the third examiner and as the chairman of the examination committee, respectively.

Financial support by Fonds der Chemischen Industrie (Kekulé scholarship) is gratefully acknowledged, as it ensured my monthly income and made conference contributions possible. Fruitful collaborative research projects were realized together with Dr. Lionel Perrin, Prof. Dr. Laurent Maron, M. Sc. Julien Engel, Prof. Dr. Gerhard Raabe, Prof. Dr. Timothy P. Hanusa (theoretical chemistry) as well as M. Sc. Fangfang Pan and Prof. Dr. Ulli Englert (crystallography). Thank you for a good working atmosphere and for your valuable contributions.

Thanks to Toni Gossen, Rachida Bomahrat, and Manuela Lumbardu-Böhme for carrying out numerous NMR measurements and for doing a good job at performing time consuming special measurements while keeping the everyday business running. Furthermore, I want to thank all members of the Englert group for skillful picking of single crystals and single crystal X-ray data collection. Thanks to Dr. Thomas Spaniol for solving and refining these data sets.

I would like to thank M. Sc. Christoph Malbertz and B. Sc. Lara Lemmerz, who contributed to this work as a research student and as a bachelor student, respectively.

A special thanks to all former and current members of the Okuda group for initially welcoming me in the group, for creating a good working atmosphere, for helpful discussions, and for the good times we had in and outside the lab. Apart from all chemistry related support: thank you for daily espresso breaks, weekly football matches, trips to Spa, barbecues, Kegeln, and many more activities that led to recreation in one way or another.

Thanks to all former and current members of the Powerlaboratorium 2: it was a pleasure to work with you – good work-nonsense balance!

Finally, I would like to thank Regina and my friends and family for their constant backup and support. I could always count on you. Thank you for sharing ups and downs with me!

The work delineated here was carried out between January 2010 and December 2012 in the laboratories of Prof. Dr. Jun Okuda, at the Institute of Inorganic Chemistry of RWTH Aachen University, Germany.

# Table of Contents

A. Introduction .....	1
A.1. Aims and Scope of this Thesis .....	1
A.2. Relevance of Allyl Metal Compounds .....	2
A.3. Synthesis of Allyl Metal Compounds .....	3
A.4. Structure of Allyl Metal Compounds .....	4
A.4.1. Structure in the Solid State .....	4
A.4.2. Structure in Solution .....	7
A.4.3. Dynamics and Mechanisms of Allyl Exchange .....	10
A.5. Trends in the Periodic System of the Elements .....	12
A.5.1. Group 1 (Li-Cs) .....	13
A.5.2. Group 2 (Be-Ba) .....	14
A.5.3. Group 12 (Zn-Hg) .....	16
A.5.4. Group 13 (B-Tl) .....	18
A.5.5. Group 14 (Si-Pb) .....	20
A.5.6. Group 15 (As-Bi) .....	21
A.5.7. Group 16 (Te) .....	22
A.6. Allyl Specific Reactivities .....	22
A.6.1. Allylation of Aldehydes, Ketones, and Imines .....	23
A.6.2. Dearomatization of <i>N</i> -Heteroaromatics .....	25
A.6.3. Allyl Coupling Reactions .....	27
A.6.4. Polymerization Reactions .....	29
A.6.5. Metalorganic Chemical Vapor Deposition (MOCVD) .....	30
A.7. Summary and Perspective .....	31
A.8. References .....	32
B. Results and Discussion .....	45
B.1. Charged Allyl Magnesium Compounds .....	45
B.1.1. Introduction .....	45
B.1.2. Results and Discussion .....	46
B.1.3. Conclusion .....	55
B.1.4. Experimental Section .....	56
B.1.5. Supporting Information .....	60
B.1.6. References .....	66
B.2. Cationic Allyl Calcium Compounds .....	73
B.2.1. Introduction .....	73
B.2.2. Results and Discussion .....	73
B.2.3. Conclusion .....	80
B.2.4. Experimental Section .....	80
B.2.5. Supporting Information .....	84
B.2.6. References .....	86
B.3. Neutral Allyl Zinc Compounds .....	91
B.3.1. Introduction .....	91
B.3.2. Results and Discussion .....	92
B.3.3. Conclusion .....	97
B.3.4. Experimental Section .....	97
B.3.5. References .....	99
B.4. Cationic Allyl Zinc Compounds .....	103
B.4.1. Introduction .....	103

B.4.2. Results and Discussion .....	103
B.4.3. Conclusion .....	109
B.4.4. Experimental Section.....	109
B.4.5. Supporting Information .....	115
B.4.6. References .....	120
B.5. Cationic Zinc Hydride Compound .....	125
B.5.1. Introduction .....	125
B.5.2. Results and Discussion .....	125
B.5.3. Conclusions .....	126
B.5.4. Experimental Section.....	126
B.5.5. References .....	127
B.6. Anionic Allyl Zinc Compounds .....	129
B.6.1. Introduction .....	129
B.6.2. Results and Discussion .....	129
B.6.3. Conclusion.....	133
B.6.4. Experimental Section.....	134
B.6.5. Supporting Information .....	135
B.6.6. References .....	151
B.7. Cationic, Neutral, and Anionic Allyl Aluminum Compounds .....	155
B.7.1. Introduction .....	155
B.7.2. Results and Discussion .....	155
B.7.3. Conclusion .....	172
B.7.4. Experimental Section.....	173
B.7.5. Supporting Information .....	188
B.7.6. References .....	191
B.8. Cationic, Neutral, and Anionic Allyl Gallium Compounds .....	203
B.8.1. Introduction .....	203
B.8.2. Results and Discussion .....	203
B.8.3. Conclusions .....	211
B.8.4. Experimental Section.....	212
B.8.5. Supporting Information .....	221
B.8.6. References .....	223
B.9. Cationic and Neutral Allyl Bismuth Compounds.....	229
B.9.1. Introduction .....	229
B.9.2. Results and Discussion .....	229
B.9.3. Conclusion .....	236
B.9.4. Experimental Section.....	236
B.9.5. Supporting Information .....	247
B.9.6. References .....	256
C. Summary.....	263
D. Appendix .....	269
D.1. General Experimental Section.....	269
D.1.1. References .....	270
D.2. List of Abbreviations.....	271
D.3. List of Compounds .....	273
D.4. Curriculum Vitae.....	275
D.5. Publications .....	276
D.5.1. Publications in Peer-Reviewed Journals .....	276
D.5.2. Conference Contributions.....	277
D.5.3. Other Publications .....	277
