

Didaktik der Naturwissenschaften

**Bernd Ralle, Ingo Eilks (Eds.)**

**Promoting Successful Science Education  
– The Worth of Science Education Research**

A collection of invited papers inspired by the  
19<sup>th</sup> Symposium on Chemical and Science Education  
held at the University of Dortmund, 22-24 May 2008

Shaker Verlag  
Aachen 2008

## Contents

Promoting successful science education – The worth of science education research (Introduction) <i>Bernd Ralle &amp; Ingo Eilks</i> .....	1
Towards improving the practice of science instruction - On the state of conceptual change oriented research and development <i>Reinders Duit &amp; David F. Treagust</i> .....	7
Insights into student learning in science: The contribution of longi- tudinal studies <i>Gustav Hellden &amp; Russel Tytler</i> .....	19
Method of educational design-based research in science education: Why and how? <i>Marijn R. Meijer, Gjalt T. Prins, Astrid M. W. Bulte &amp; Albert Pilot</i>	31
Learning and teaching in inquiry-type chemistry laboratories <i>Avi Hofstein &amp; Rachel Mamlok-Naaman</i> .....	47
Developing and implementing new national standards in science education: The role of science educators <i>Peter Labudde</i> .....	63
Science education research to prepare future citizens - Chemistry learning in a socio-critical and problem-oriented approach <i>Ingo Eilks, Ralf Marks &amp; Timo Feierabend</i> .....	75
Science teachers' understanding of the nature of science and the nature of science education - Implications for teaching <i>Miia Rannikmäe, Arne Rannikmäe &amp; Jack Holbrook</i>	87
Reforming the teaching and learning of the macro/submicro/ symbolic representational relationship in chemical education <i>John Gilbert &amp; David F. Treagust</i> .....	99
The energy problem solved? <i>Rupert Genseberger</i> .....	111
Learning from research articles: How undergraduate life science students understand primary literature <i>Martin Goedhart, Edwin van Lacum &amp; Miriam Ossevoort</i> ...	123

Factors affecting high achievers' choices of university majors in science and engineering in Korea <i>Hae-Ae Seo</i> .....	133
In-service chemistry teachers' reflection: A metacognitive experience <i>Carmen Fernandez, José G. da Silva Lopes &amp; Josely C. Bonardo</i>	145
A research approach to developing teacher subject knowledge: The case of dissolving <i>John Oversby &amp; Anna Hedderly</i> .....	155
The model of Educational Reconstruction - A research model for the investigation of students' and teachers' conceptual ideas <i>Ilka Parchmann &amp; Michael Komorek</i> .....	169
Efficiency of systematic support and encouragement in open learning environments of <i>Chemie im Kontext</i> <i>Thomas Brehmkes &amp; Bernd Ralle</i> .....	183
Improvement of inquiry-learning using collaborative tasks <i>Maik Walpuski, Isabel Wahser &amp; Elke Sumfleth</i> .....	197
Reflections on how to promote successful science education and the worth of science education research <i>Ingo Eilks, John Gilbert, Jack Holbrook, Silvija Markic, Albert Pilot &amp; Bernd Ralle</i> .....	203
Participants of the symposium .....	211
