Contents

List of Figures.....	IV
List of Tables	VII
Introduction.....	1
1 Applications for marine underwater cables	4
2 Constructive elements of and materials for underwater cables.....	9
2.1 Metallic conductors	10
2.2 Plastic materials	10
2.3 Tapes and foils	11
2.4 Filling elements	12
2.5 Armouring elements.....	12
2.6 Strength members.....	13
2.7 Fibre optic elements	13
3 Definitions and standards.....	14
3.1 Definitions.....	14
3.2 German and international Standards	14
3.3 Non-typical applications	17
3.3.1 Filling compound	17
3.3.2 Single core cables.....	19
3.3.3 Materials, coloured with longitudinal strips	20
3.3.4 Extruded plastic materials and under-laid tapes	21
3.3.5 Semi-conductive layers	22
3.3.6 Sheath with embedded metallic diffusion blocking device	22
4 Multilayer design types.....	24
4.1 Reasons for using multilayer design	24
4.2 Insulation and sheathing materials	25
4.2.1 Skin design	27
4.2.2 Real multilayer design.....	28

4.3	Plastic-metallic tapes.....	28
4.4	Metallic conductors and armouring materials.....	29
5	Material combinations for plastic materials.....	30
5.1	Principles for use.....	30
5.2	Combinations for insulation materials.....	31
5.3	Combinations for sheathing materials.....	33
5.4	Material combinations for plastic-metallic tapes.....	38
6	Metallic materials for conductors and armouring.....	39
6.1	Metallic conductors.....	39
6.2	Armouring and strength member materials.....	40
7	Test of multilayer design for plastic materials.....	42
7.1	Test principles.....	42
7.2	Applicable standard tests.....	45
7.2.1	Mechanical tests.....	45
7.2.2	Thermal aging test.....	47
7.2.3	Water storage test.....	50
7.2.4	Water pressure tightness test.....	53
7.2.5	Insulation resistance test.....	54
7.2.6	Fire related tests.....	56
7.3	New proposals for test methods.....	56
7.3.1	Abrasion test modification.....	56
7.3.2	Bonding test.....	57
7.3.3	Flexibility test.....	61
7.3.4	Thermal aging test modification.....	63
7.3.5	Low temperature aging test.....	64
7.3.6	Fluid storage aging test.....	65
7.3.7	Water storage test modification.....	68
7.3.8	Test for compatibility of materials.....	71
7.3.9	Test for chemical resistance and environmental influences.....	72
8	Test for metallic materials.....	74

8.1	Test principles	74
8.2	Applicable test standards.....	74
9	Further future evaluations	77
	References.....	83
