

Spectroscopy of Excitons in Semiconductor Quantum Dot Molecules

Dissertation

presented to the Institute of Physics of the University of Dortmund,
Germany in partial fulfilment of the requirements for the degree of
Doktor rer. nat.

presented by
Gerhard Ortner

Dortmund, October 2004

Accepted by the faculty of the Institute of Physics of the University of Dortmund,
Germany.

Day of the oral exam: 15th of October 2004

Examination board:

Prof. Dr. Werner Weber

Prof. Dr. Manfred Bayer

Prof. Dr. Metin Tolan

Dr. Dmitri Yakovlev

Berichte aus der Physik

Contents

1	Introduction	1
2	Fundamentals of quantum information processing and its implementation in semiconductors	5
2.1	From classical to quantum computation	5
2.2	Fundamentals of quantum information processing	8
2.2.1	Qu-bits and quantum gates	8
2.2.2	No cloning theorem	10
2.2.3	Quantum cryptography and teleportation	11
2.2.4	Quantum information processing and quantum algorithms	13
2.3	Concepts towards semiconductor implementation	16
2.3.1	Overview of promising concepts	16
2.3.2	Quantum computation with quantum dots	20
3	Experimental technique and samples	31
3.1	Experimental setup	31
3.2	Quantum dot molecule samples	32
3.2.1	Quantum dot growth	33
3.2.2	Patterning of the quantum dot samples	37
4	Demonstration of tunnel coupling	41
4.1	Indications of tunnel coupling from quantum dot molecule ensembles	42
4.2	Indications of tunnel coupling from quantum dot molecule arrays	43
4.3	Fine structure of excitons	47
4.3.1	Fine structure of wide barrier samples	48
4.3.2	Fine structure of small barrier samples	75
4.3.3	Diamagnetic shift in Faraday-configuration	78
4.3.4	Spin-splitting in Faraday-configuration	80

4.4	Quantum dot molecules in high magnetic fields	82
4.4.1	Quantum dot molecule ensembles	82
4.4.2	Single quantum dot molecules	86
4.5	Biexcitons in quantum dot molecules	88
5	Control of tunnel coupling	93
5.1	Basic idea and experimental realization	93
5.2	Experimental demonstration and theoretical validation of the control of tunnel coupling	95
6	Summary	105
7	Outlook	107
	Bibliography	111
