Volume 3 – Wednesday, March 22nd

Group 4: Mobile Applications

Group 5: Pneumatics

Group 6: Pumps

Group 7: Simulation

Group 8: System Engineering

Dear Ladies and Gentlemen,

two years have gone by since the last IFK in Dresden and four years already since the event took place in Aachen. It's my pleasure to welcome you in Aachen to join the 5th IFK.

The Programme Committee was able to select an exceptional programme amongst 160 proposals from more than 20 different nations. The conference themed 'Customer Benefits of Fluid Power' aims at reaching all users of fluid power. It offers a forum to present new developments and innovations and to discuss the benefits with manufacturers and their customers as well as scientists from university.

The Workshop on Monday the 20th of March provides the opportunity for scientists as well as representatives from industry to introduce new developments with a special focus on demonstration and simulation. The conference on 21st and 22nd of March is accompanied by the traditional exhibition.

We are looking forward to the personal exchange and wish you a successful stay at the 5th IFK in Aachen in March 2006.

Sehr geehrte Damen und Herren,

zwei Jahre sind bereits vergangen seit dem letzten IFK in Dresden und vier Jahre seit dem 3. IFK in Aachen. Es ist mir daher eine große Freude, Sie zum 5. IFK in Aachen willkommen zu heißen.

Der Programmausschuss war in der Lage, aus etwa 160 Vorschlägen von über 20 verschiedenen Nationen ein außerordentliches Programm zusammen zu stellen. Die Tagung steht unter dem Motto 'Customer Benefits of Fluid Power' und zielt darauf, alle Anwender der Fluidtechnik anzusprechen. Es wird ein Forum geboten, um neueste Entwicklungen und Innovationen vorzustellen und die Wertschöpfung mit Herstellern, deren Kunden sowie den Hochschulvertretern zu diskutieren.

Am Montag, den 20. März bietet ein Workshop Wissenschaftlern und Industrievertretern die Gelegenheit zur Vorstellung neuer Entwicklungen. Der Fokus liegt dabei auf interaktiven Demonstrationen und Simulationen. Die Konferenz am 21. und 22. März wird traditionell wieder von einer Fachausstellung begleitet.

Wir freuen uns auf das persönliche Gespräch mit Ihnen und wünschen Ihnen eine erfolgreiche Teilnahme am 5. IFK im März 2006 in Aachen.

Hubertus Murrenhoff

Programme Committee

Bodenstein, B.	Dipl.-Ing., Dieffenbacher, Eppingen
Boes, C.	Dr.-Ing., Moog, Böblingen
Bootz, A.	Dr.-Ing., BMW, München
Duffner, E.	Dr.rer.nat., Arburg, Lossburg
Ellwein, C.	Dr.-Ing., Bürkert, Großröhrsdorf
Feldmann, D.G.	Univ.-Prof.Dr.-Ing., TU Hamburg-Harburg
Feuser, A.	Dr.-Ing., Bosch Rexroth, Lohr
Fischer, M.	Dr.-Ing., Weber Hydraulik, Güglingen
Fredriksen, N.	Dipl.-Ing., Claas, Paderborn
Goedecke, W.-D.	Prof.Dr.-Ing., GAS, St.Georgen
Hahmann, W.	Dr.-Ing., Society of Advancement for Fluid Power Technology Inc., Aachen
Harms, H.-H.	Univ.-Prof.Dr.-Ing., TU Braunschweig
Helduser, S.	Univ.-Prof.Dr.-Ing., TU Dresden
Jongbloed, H.	Dr.-Ing., Wessel-Hydraulik, Wilhelmshaven
Klein, A.	Dr.-Ing., Opel, Rüsselsheim
Kunze, T.	Dr.-Ing., Bosch Rexroth, Horb
Langen, A.	Dr.-Ing., Linde, Aschaffenburg
Lauth, H.J.	Dipl.-Ing., LUK Fahrzeug Hydraulik, Bad Homburg
Lingg, G.	Dr.-Ing., Fuchs Petrolub, Mannheim
Morath, E.	Dipl.-Ing., Liebherr, Ehingen

Conference Organisation

Frau	J. Zacharias
Dipl.-Ing.	W. Gauchel
Dipl.-Ing. ETH	A. Schultz

Group 4: Mobile Applications

E. Skirde, G. Geerling	Mobile hydraulics - an overview	13
M. Ivantysynova et al.	Continuously variable transmissions for truck applications - secondary control versus power split	25
T. Kohmäscher et al.	Comparison of selected fluidtechnical drive line concepts for off-highway machines	45
H. Försterling	Hydro - pneumatic drive powered by compressed air for mobile machinery especially utility vehicles	57
Ch. Schottler et al.	Electronic flow control valve (EFCV) with pressure compensation capability	69
M. Fischer et al.	Low friction suspension cylinders for agricultural machines	81
Th. Fedde, H.-H. Harms	An adaptive hydraulic system for mobile applications	95
H. Yang et al.	Earth pressure balance control for a test rig of shield tunnelling machine using electrohydraulic proportional techniques	107
A. Winger et al.	Thermo - hydraulic free piston engine (fpe) as a primary propulsion unit in mobile hydraulic drives	119

Group 5: Pneumatics

P. Post	Technological leadership of pneumatics - solutions and customer applications in industrial automation	133
J. Berbuert, M. Heise	Vacontrol – a modular monitoring and control system for air - operated armatures	149
S. Schneider et al.	Optimisation of brake systems by the implementation of pneumatic simulation	161
F. Schnur	Servo pneumatic drives for weld guns	171
P. Christiani	Safety related pneumatics, a part of a safety control chain	183
M. Meuser	Control concepts for servopneumatic drive tasks	195
R. Neumann, A. Hartmann	Combination of advantages: The electro - pneumatic hybrid drive	207
F. Seehausen	Servo pneumatics for mobile applications	209
S. Zschill et al.	Smart steering solution for high dynamic pneumatic drives	221

Group 6: Pumps

A. E. Sanderson et al.	A new principle for hydraulic pumps and motors, the Sanderson rocker-arm mechanism (SRAM)	235
H.-Ch. Bartelt, D. G. Feldmann	Ceramic pistons and bushings in hydrostatic axial piston machines – test procedures and results	247
W. Fiebig	Using of simulation tools for noise reduction in fluid power systems	263
Th. Kunze, S. Berneke	Noise reduction at hydrostatic pumps by structure optimization and acoustic simulation	275

Group 7: Simulation

M. Achenbach	Life time prediction of seals by numerical simulation	289
M. Anders	A comparison of different simulation models considering a linear actuator as an example	303
A. Schultz, P. Tappe	The method of finite elements in the design process of valve solenoids	315
D. Wehner et al.	Virtual prototyping of pressure control valves	327
V. Zöppig et al.	Mechatronic drive concepts for pneumatic mini valves	341
W. Kuhlbusch et al.	Design of the robot arm of the Astronaut A3 milking system	353
H. Ulrich, H. Baum	Interfacing digital controller hardware and virtual prototyping environments – benefits and state of the art techniques	365
A. Pöttker	Mechanic - hydraulic co-simulation on mining excavators	381

Group 8: System Engineering

B. Hauber	Variable displacement hydraulic motors used for high lift systems of commercial aircrafts (on the example of the Airbus A380 flap system)	395
S. Hein et al.	Innovative dynamically add - on sensor for preventive maintenance	407
M. Münchhof	Model – based fault management for a hydraulic servo axis	419
H. Jagolski et al.	Solutions with fluid power: “A380 high lift system test” and “The drop tower catapult”	431
