Volume 2 – Tuesday, March 21st

- Group 1: Stationary Applications**
- Group 2: Materials and Fluids**
- Group 3: Automotive**

Dear Ladies and Gentlemen,

two years have gone by since the last IFK in Dresden and four years already since the event took place in Aachen. It's my pleasure to welcome you in Aachen to join the 5th IFK.

The Programme Committee was able to select an exceptional programme amongst 160 proposals from more than 20 different nations. The conference themed 'Customer Benefits of Fluid Power' aims at reaching all users of fluid power. It offers a forum to present new developments and innovations and to discuss the benefits with manufacturers and their customers as well as scientists from university.

The Workshop on Monday the 20th of March provides the opportunity for scientists as well as representatives from industry to introduce new developments with a special focus on demonstration and simulation. The conference on 21st and 22nd of March is accompanied by the traditional exhibition.

We are looking forward to the personal exchange and wish you a successful stay at the 5th IFK in Aachen in March 2006.

Sehr geehrte Damen und Herren,

zwei Jahre sind bereits vergangen seit dem letzten IFK in Dresden und vier Jahre seit dem 3. IFK in Aachen. Es ist mir daher eine große Freude, Sie zum 5. IFK in Aachen willkommen zu heißen.

Der Programmausschuss war in der Lage, aus etwa 160 Vorschlägen von über 20 verschiedenen Nationen ein außerordentliches Programm zusammen zu stellen. Die Tagung steht unter dem Motto 'Customer Benefits of Fluid Power' und zielt darauf, alle Anwender der Fluidtechnik anzusprechen. Es wird ein Forum geboten, um neueste Entwicklungen und Innovationen vorzustellen und die Wertschöpfung mit Herstellern, deren Kunden sowie den Hochschulvertretern zu diskutieren.

Am Montag, den 20. März bietet ein Workshop Wissenschaftlern und Industrievertretern die Gelegenheit zur Vorstellung neuer Entwicklungen. Der Fokus liegt dabei auf interaktiven Demonstrationen und Simulationen. Die Konferenz am 21. und 22. März wird traditionell wieder von einer Fachausstellung begleitet.

Wir freuen uns auf das persönliche Gespräch mit Ihnen und wünschen Ihnen eine erfolgreiche Teilnahme am 5. IFK im März 2006 in Aachen.

Hubertus Murrenhoff

Programme Committee

Bodenstein, B.	Dipl.-Ing., Dieffenbacher, Eppingen
Boes, C.	Dr.-Ing., Moog, Böblingen
Bootz, A.	Dr.-Ing., BMW, München
Duffner, E.	Dr.rer.nat., Arburg, Lossburg
Ellwein, C.	Dr.-Ing., Bürkert, Großröhrsdorf
Feldmann, D.G.	Univ.-Prof.Dr.-Ing., TU Hamburg-Harburg
Feuser, A.	Dr.-Ing., Bosch Rexroth, Lohr
Fischer, M.	Dr.-Ing., Weber Hydraulik, Güglingen
Fredriksen, N.	Dipl.-Ing., Claas, Paderborn
Goedecke, W.-D.	Prof.Dr.-Ing., GAS, St.Georgen
Hahmann, W.	Dr.-Ing., Society of Advancement for Fluid Power Technology Inc., Aachen
Harms, H.-H.	Univ.-Prof.Dr.-Ing., TU Braunschweig
Helduser, S.	Univ.-Prof.Dr.-Ing., TU Dresden
Jongbloed, H.	Dr.-Ing., Wessel-Hydraulik, Wilhelmshaven
Klein, A.	Dr.-Ing., Opel, Rüsselsheim
Kunze, T.	Dr.-Ing., Bosch Rexroth, Horb
Langen, A.	Dr.-Ing., Linde, Aschaffenburg
Lauth, H.J.	Dipl.-Ing., LUK Fahrzeug Hydraulik, Bad Homburg
Lingg, G.	Dr.-Ing., Fuchs Petrolub, Mannheim
Morath, E.	Dipl.-Ing., Liebherr, Ehingen
Murrenhoff, H.	Univ.-Prof.Dr.-Ing., RWTH Aachen University
Paulus, Th.	Dipl.-Ing., IMI Norgren-Herion, Fellbach
Post, P.	Dr.-Ing., Festo, Esslingen
Saffe, P.	Dr.-Ing., Bosch Rexroth, Laatzen
Skirde, E.	Dipl.-Ing., Sauer-Danfoss, Neumünster
Synek, P.	Dipl.-Ing., Fluid Power Association of the German Engineering Federation (VDMA), Frankfurt/Main
Weber, J.	Dr.-Ing., CNH Baumaschinen, Berlin
Weingarten, F.	Dr.-Ing., Parker Hannifin, Kaarst
Weishaupt, E.	Dr.-Ing., Hydac System, Sulzbach
Wennmacher, G.	Dr.-Ing., Liebherr-Aerospace, Lindenberg

Edge, K.	Prof., University of Bath, Bath
Ivantysynova, M.	Prof., Purdue University, West Lafayette
Koski, R.J.	Sun Hydraulics Corp., Sarasota
Lu, Yong Xiang	Prof.Dr.-Ing., Zhejiang University, Hangzhou
Palmberg, J.-O.	Prof., Linköping University, Linköping
Scavarda, S.	Prof., INSA, Villeurbanne Cedex
Takahashi, K.	Prof., Sophia University, Tokyo
Vilenius, M.	Prof., Tampere University of Technology, Tampere

Conference Organisation

Frau	J. Zacharias
Dipl.-Ing.	W. Gauchel
Dipl.-Ing. ETH	A. Schultz

Group 1: Stationary Applications

H. Murrenhoff	Hydraulic drives in stationary applications	11
A. Feißt, W. Kato	Optimisation of the hydraulic control of a drive with 12.000 kW driving power	37
H. Nolte, U. Muschalik	Multifunctional main cylinder for hydraulic presses using an extrusion press as an example	47
D. Becher	Low noise, increased reliability, digital control – a new generation of radial piston pumps	59
U. Schuster	Reliability of hydraulic valves - determining the $MTTF_d$ - value of hydraulic directional control valves	71
Ch. Boes	The advantages of new proportional and servo valves with integrated digital electronics	83
J. Dantlgraber	Linear hybrid force booster in a flanging machine application	95
W. Hagemeister, J. Matuschka	Endurance test bench for hydraulic valves under extreme ambient conditions	103
A. Knödel et al.	Active hydrostatic guiding system with integrated, adaptronical sensor / actuator unit	115
M. Reichert	Development of a piezo-driven pilot stage for highly dynamic hydraulic valves	127
F. Rüdiger, S. Helduser	Analysis and evaluation of sound emission in hydraulic valves	139

Group 2: Materials and Fluids

G. Lingg, W. Bock	Hydraulic fluids – liquid machine elements	153
H. Mannebach	Condition monitoring for hydraulic and lubricating fluids, products and applications	165
Th. Meindorf, W. Mann	Test and development of condition-monitoring sensors for fluid power applications	177
F.-H. Suilmann, S. Mundry	Development of an electrohydraulic control unit for underground shield support systems / inline technology	189
A. Yuge et al.	Performance of the water hydraulic pump using DLC coatings	203
J. Leichnetz et al.	Air and foam in lubricants and hydraulic oils - a new method for testing the foaming reaction of oils	215
Ch. Trahan	Taking care of oil systems – a new approach	229
H. Görlitzer et al.	Efficiency advantages in vane, piston and gear pumps – what high VI hydraulic fluids can do for you!	233
H. Theissen et al.	Bio-based oils in hydraulics – experiences from five years of market introduction in Germany	247
O.-C. Göhler, H. Rüschkamp	The problem of mixture: Contamination of biogenous oils with mineral oils	259
J. Schmidt et al.	Application of a new test procedure for mechanical testing of hydraulic fluids	269

Group 3: Automotive

S. Rotthäuser, H.-J. Lauth	Speed modulator for the simulation of combustion engine behaviour	283
W. Döhla et al.	Hydraulic valve blocks for an active suspension system	295
A. Bootz et al.	Evolutionary energy saving concepts for hydraulic power steering systems	307
D. van Bebber	Reduction of pressure waves in common rail systems by improving system design parameters	309
