

Information Processing and Learning in Networks of Cortical Columns

DISSERTATION

zur

Erlangung des Grades

„Doktor der Naturwissenschaften“

an der Fakultät für Physik und Astronomie
der Ruhr-Universität Bochum

von

Jörg Lücke

aus

Paderborn

Bochum 2004

Dissertation an der Fakultät für Physik und Astronomie
der Ruhr-Universität Bochum

1. Gutachter: Prof. Dr. Christoph von der Malsburg
2. Gutachter: Prof. Dr. Günter Wunner

Tag der Disputation: 1. Februar 2005

Berichte aus der Biophysik

Jörg Lücke

**Information Processing and Learning
in Networks of Cortical Columns**

Acknowledgment

I thank J. D. Bouecke for his help in acquiring simulation results and I thank I. J. Wundrich, R. P. Würtz, and C. von der Malsburg for many discussions and useful suggestions. Further thanks go to B. Bolder, D. Garrett, S. Wu, and J. Zhu who improved this work by their feedback on my research. Special thanks go to A. C. Möller for her scientific and at least as important non-scientific support.

Contents

List of Symbols	7
1 Introduction	9
2 Neural Dynamics of the Macrocolumn	13
2.1 Model of the Minicolumn	13
2.2 Model of the Macrocolumn	15
2.3 Stability Analysis	16
2.4 Afferent Fibers	18
2.5 Conclusion and Discussion	22
3 Self-Organizing Receptive Fields	25
3.1 Hebbian Plasticity	25
3.2 Experiments of Receptive Field Self-Organization	29
3.2.1 Pattern Classification	31
3.2.2 Extraction of Features	33
3.3 Hierarchical Self-Organization	40
3.4 Experiments of Hierarchical Receptive Field Self-Organization	43
3.4.1 Input with Hierarchical Similarity Structure	44
3.4.2 The Continuous Bars Test	48
3.5 Conclusion and Discussion	53
4 Clustering with Receptive Field Self-Organization	57
4.1 Place Coding of Continuous Variables	57
4.2 Receptive Field Self-Organization	58
4.2.1 Visualization	59
4.2.2 Clustering of More Complex Data	62
4.2.3 Data Point Superpositions	62
4.2.4 Higher Dimensional Data	63
4.3 Conclusion and Discussion	64
5 Abstraction of Macrocolumn Dynamics	67
5.1 Basic Assumptions	67
5.1.1 Stationary Points and Stability	68
5.1.2 An Explicit Activation Function	71
5.1.3 An Explicit Macrocolumn Dynamics	72
5.1.4 More Complex Dynamics	76
5.2 Afferent Connections	76
5.3 Hierarchical Self-Organization	81
5.4 Clustering	85
5.5 Conclusion	87

6	Rapid Dynamic Link Matching	89
6.1	Principles of Dynamic Link Matching	90
6.2	Representation of a Feature Vector	94
6.3	A Network of Two Macrocolumns	96
6.4	A Macrocolumn Network for Similarity Matching	98
6.5	Matching in a Macrocolumn Network	100
6.6	Topological Matching	104
	6.6.1 Emergence of Topological Interconnectivity	107
	6.6.2 Topological Matching	109
6.7	Conclusion and Future Work	114
7	Summary	117
	Appendix	119
	List of Figures	125
	References	127
	Curriculum Vitae	137
