Doumeingts, Guy:

A Methodology for Re-engineering and Information Technology Implementation/

Doumeingts, Guy u.a.. - Als Ms. gedr. -

Aachen: Shaker, 1999

(Esim - European Series in Industrial Management; Bd. 99,1)

ISBN3-8265-4885-X

The research work described here was funded by the European Commission in the framework of the ESPRIT IV programme (EP 23357)

Contents

1. REALMS - An Alternative Re-engineering Methodology?	5
1.1 The Aims of the REALMS Methodology	5
1.2 The REALMS Project	6
2. The REALMS Methodology	9
2.1 Structured Approach of the REALMS Methodology	10
2.2 Modeling of the Process	11
2.3 Analysis and Evaluation of the Process	12
2.4 Design of the New Business Process	14
2.5 Search for Solutions	15
2.6 Evaluation of Solutions and Calculation of Benefits	15
2.7 Implementation of Solutions	16
2.8 Evaluation of Results	17
3. The GRAI Integrated Methodology (GIM)	19
3.1 A Reference Model for the Production System: The GRAI Model	19
3.1.1 Reference Model of the Production System	20
3.1.1.1 The Physical System	21
3.1.1.2 The Decision System	22
3.1.1.3 The Information System	25
3.1.2 Reference Model for the Local Production System	25
3.2 The Formalisms	26
3.2.1 Formalisms for the Functional View	28
3.2.2 Formalisms for the Physical System	29
3.2.3 Formalisms for the Decisional System	31
3.2.4 Formalisms for Information System	36
3.3 The GIM Structured Approach	37
3.3.1 Modeling Phase	37
3.3.2 Design Phase	38
3.3.3 From User Specifications to Technical Specifications	39
3.4 Detecting weak points using the GRAI grid	41
3.5 Conclusions on GIM	43

4.	Dynamical Analysis with the Simulation Tool FEMOS	46
4.1	Reasons for Simulating Production Systems	46
4.2	Introduction to the Functionality of FEMOS	47
4.2.1	General Application Fields for the Simulation Tool FEMOS	47
4.2.2	Modeling Production Systems in FEMOS	49
4.2.3	Simulating and Evaluating Production Systems with FEMOS	53
4.3	Simulating a Production System with FEMOS Step by Step	56
4.3.1	Modeling the Production System with FEMOS	56
4.3.2	Online-Analysis of the Production System with FEMOS	60
4.3.3	Evaluating the Simulation Results	60
4.4	Case Study: Simulating a Rolling Mill with FEMOS	61
5.	Performance Analysis with Activity Based Costing	69
5.1	Introduction	69
5.2	Principles of Activity Based Costing	69
5.2.1	Resources	71
5.2.2	Activities	71
5.2.3	Cost Drivers	72
5.2.4	Objects	72
5.3	Activity Based Management – The Connection with BPR	73
5.4	The Role of ABC and ABM in the REALMS Methodology	74
5.5	Exemplary Application of ABC	78
5.5.1	Methodology of Setup Calculations	79
5.5.2	ABC Analysis Results	82
5.6	Conclusions on ABC	86
6.	Combined Application of the Different Re-engineering Methods	87
6.1	Purpose of Combining Re-engineering Methods	87
6.2	Modeling and Simulating a Business Process Using GIM and FEMOS	87

6.2.1	Identification of Significant GRAI Elements	88
6.2.2	Assignment of Simulation Elements	88
6.2.3	Structural Adaptation	92
6.2.4	Modeling the Situation of a Production System	93
6.2.5	Design Model	95
6.2.6	Simulation	100
6.2.7	Results	100
6.2.8	Conclusion	105
6.3	Integration of the GRAI Integrated Methodology and Activity Based Costing	106
6.4	Dynamic Analysis Supported by Activity Based Costing	114
6.4.1	Benefits in Combining ABC with Simulation	114
6.4.2	Example of Calculating ABC Based Performance Indicators by Simulation	115
6.5	Conclusion in Combining Re-engineering Approaches	117
7.	The ELVAL Case: Application of the REALMS Methodology	118
7.1	Definition and Start-up of the Project	118
7.2	Analysis and Modeling of the Existing Business Process	119
7.2.1	Methodology Followed	119
7.2.2	Analysis of the Business Process with GIM	121
7.2.3	Design of the Simulation Model	126
7.2.4	Evaluation of the Business Process	127
7.2.4.1	General Evaluation Approach	127
7.2.4.2	Performance Indicators Definition	128
7.3	Design of the New Business Process	131
7.3.1	Design of the New Customer Offer Process	131
7.3.2	Transfer of the New Customer Offer Process to FEMOS	133
7.4	Search and Evaluation of Solutions	134
7.4.1	Traditional IT Selection Approaches	134
7.4.2	The REALMS Software Selection Approach	136
7.4.2.1	Overall Approach	137
7.4.2.2	The Selection Criteria Catalogues	138
7.4.2.3	Value Analysis	140
7.4.3	Results for the Detailed Scheduling Tool	142

7.4.4	Make or Buy Comparison	146
7.5	Implementation and Evaluation of the Results	149
7.5.1	Implementation of the Results	149
7.5.2	Evaluation of the Results	151
8.	Further Fields of Application	160
8.1	Further Industrial and Commercial Applications	160
8.2	BPR Methods in Education	161
9.	Conclusions and Recommendations	164
10.	References	166
