# Acknowledgements

My special thanks belongs to my supervisor Prof. Dr. Jürgen von Hagen, who successfully convinced and motivated me almost four years ago to continue my Ph.D. studies at the Center for European Integration Studies. He provided me a friendly and stimulating environment for research and guided me through each stage of my dissertation. I also owe gratitude to my second supervisor Prof. Dr. Erik Theissen for his willingness to read this dissertation and for his fruitful comments.

I would like to thank Prof. Dr. Casper de Vries for his patience, helpful discussions and critics. Parts of the third chapter of this dissertation are based on joint work with him. I also thank my co-author Dr. Ludger Schuknecht, who offered me a friendly working environment at the Fiscal Policy Division of the European Central Bank.

My thanks also goes to all my ZEI colleagues for their stimulating discussions on topics related to this dissertation, and for the nice work atmosphere they provided at the Center for European Integration Studies. Particularly, I would like to thank Rudolph Maier, Michael Massmann, Matthias Paustian, Guntram Wolff, and Jennifer Wu.

Finally, I want to thank my friends and, most importantly, my family for their steady support and encouraging words in the last three years.
