Content

1. Introduction	1
2. Methodology	2
3. Results and Discussions	4
3.1. Socio-demographic characteristics	4
3.2. Purchase criteria	11
3.2.1. Six most important features taking into consideration when buying a new washing machine based on the priority in each country	11
3.2.2. Six most important features when buying a new washing machine and socio-demographic characteristics	12
3.2.3. Type and source of information supporting purchase decisions	15
3.3. Characteristics of washing machine	20
3.3.1. Age of washing machine	20
• Age of washing machine and socio-demographic characteristics	21
3.3.2. Loading capacity of washing machine (Rated capacity)	23
• Satisfaction with the loading capacity	25
3.3.3. Maximum Spin speed of the washing machine	29
3.3.4. Delay start function	34
• Usage of the delay start function	37
3.4. Washing behaviour	42
3.4.1. Pre-washing the clothes inside the washing machine	42
3.4.2. Use of fabric enhancer	47
3.4.3. Washing detergents	50
3.4.4. Dosage behaviour	52
3.4.5. Detergent placement	56
3.4.6. Sorting clothes in the laundry	59
3.4.7. Loading behaviour	64
3.4.8. Loads of laundry being washed per week in the household	69
3.4.9. Washing programmes used	74
3.4.10. Average washing temperature	82
3.4.11. Approximate duration of the washing programme	87
3.4.12. Time of the day that washing machine is normally used	93
3.4.13. Washing programmes with short cycles	95
3.4.14. Washing at high temperatures	100
3.4.15. Washing programmes with long cycles	106
3.4.16. Energy-saving programme	111
3.4.16.1. Recognition of energy saving programme and socio-demographic characteristics	112
3.4.16.2. Recognition of energy saving programmes and age of washing machine	115

3.4.16.3. How to identify energy saving programme on a washing machine	115
3.4.16.4. Energy saving programme and different kinds of clothes	119
3.4.17. Switching off the appliance	120
• Switching off the appliance and socio-demographic characteristics.....	121
3.5. Drying behaviour	122
• Drying laundry and socio-demographic characteristics.....	124
3.6. Ironing after finishing the cycle	126
• Ironing after finishing the cycle and socio-demographic characteristics	127
3.7. Expectations/Acceptance	130
3.7.1. Programme options.....	130
3.7.1.1. Different options to save energy or money and country specific result	130
3.7.1.2. Using more of the washing machines capacity and/or washing full loads as an option to save energy or money and loading behaviour	131
3.7.2. Importance of characteristics of a washing programme and country specific results.....	136
3.7.3. Hypothetical programmes	139
• Hypothetical programmes and socio-demographic characteristics.....	139
3.7.4. Expectations regarding the washing machine with the highest Energy Label efficiency class available on the market.....	142
• Expectation about a washing machine with the highest Energy Label efficiency class to save ... and socio-demographic characteristics.....	143
3.7.5. Trends to lower washing temperature	146
3.7.5.1. Trends to lower washing temperature and socio-demographic characteristics	146
3.7.5.2. Acceptance of deviation from the nominal temperature of the programme and socio-demographic characteristics	150
3.8. Washer-dryer	153
3.8.1. Opinion about washer-dryer and socio-demographic characteristics	153
3.8.2. Opinion about washer-dryer and age of washing machine	157
3.9. Information on Energy Label.....	157
3.9.1. Recognition of the information on the Energy Label and socio- demographic characteristics	158
3.9.2. Information expected on the Energy Label- Country specific results	161
3.9.3. Information expected on the Energy Label- Socio-demographic characteristics	163
4. Summary.....	166
Acknowledgement	168
References	169
List of figures.....	170
List of tables	177
5. Annex	i
5.1. Numerical values	i

5.2.	Coding values	x
5.3.	Online Questionnaire	xii
