

Secondary Structural Changes of Spray Dried Proteins with Fourier Transform Infrared Spectroscopy

Den Naturwissenschaftlichen Fakultäten
der Friedrich-Alexander Universität Erlangen-Nürnberg
zur
Erlangung des Doktorgrades

vorgelegt von
Alexander Mauerer
aus
Erlangen

März 2006

Als Dissertation genehmigt von den Naturwissenschaftlichen Fakultäten der
Friedrich-Alexander Universität Erlangen-Nürnberg

Tag der mündlichen Prüfung:	30. März 2006
Vorsitzender der Prüfungskommission:	Prof. Dr. D.-P. Häder
Erstberichterstatter:	Prof. Dr. G. Lee
Zweitberichterstatter:	Prof. Dr. W. Frieß

Monographs in Pharmaceutics

Band 3

Alexander Maurer

**Secondary Structural Changes
of Spray Dried Proteins with
Fourier Transform Infrared Spectroscopy**

D 29 (Diss. Universität Erlangen-Nürnberg)

Shaker Verlag
Aachen 2006

Für meinen Vater

Parts of this work have been previously presented or published in parts:

Mauerer, A. and Lee, G. (2003). Changes in the Secondary Structure of Poly-L-Lysine on Spray Drying. *Controlled Release Society German Chapter Annual Meeting*. Munich

Mauerer, A. and Lee, G. (2004). Effects of Stabilizers on the Secondary Structure of Poly-L-lysine during Spray Drying. *International Meeting on Pharmaceutics, Biopharmaceutics and Pharmaceutical Technology*. Nuremberg

Mauerer, A. and Lee, G. (2006). Changes in the amide I FT-IR bands of poly-L-lysine on spray-drying from α -helix, β -sheet or random coil conformations. *European Journal of Pharmaceutics and Biopharmaceutics*, 62:131-142

Acknowledgements

The present thesis has been acquired between July 2002 and March 2006 at the Department of Pharmaceutics, Friedrich-Alexander University Erlangen-Nuremberg, Erlangen, Germany.

First of all, Professor Dr. Geoffrey Lee is gratefully acknowledged for offering me the opportunity to work in an exciting field of research, for his constant interest and support in the progress of the project and the friendly atmosphere within the department. Additionally I would like to thank him for giving me the chance of taking several valuable courses at the local Rechenzentrum.

Professor W. Frieß, Department of Pharmaceutics, University of Munich, is thanked for kindly being co-referee for this thesis.

Very special thanks to the Deutsche Forschungsgesellschaft, which supported the project. (DFG Le 626/7-1)

Within the Department of Pharmaceutics, I would first of all like to thank Dr. Christian Rochelle for the great time we had being co-residents in the lab and for the many professional and privat words we shared! Peter Lassner for his long term fellowship during our studies in pharmacy and as PhD graduates. Dr. Stefan Seyferth

for unbelievable good games of soccer within our little soccer team. Dr. Christian Führling, Dr. Stefan Seyferth, Dr. Christian Rochelle, Heiko Schiffter, Jürgen Bögelein, Peter Lassner, Henning Wegner, Andreas Ziegler, and Eva Schmidt for a tremendous time not only at the department. This is to be continued! All other colleagues are also acknowledged for the good cooperation within the students' practical courses and the friendly atmosphere.

The help of Nina Teiwes for supporting my work within her practical training and Swetlana Sachnov are gratefully acknowledged.

Within the department, I would like to further address sincere thanks to Winfried Bauer and Josef Hubert and their workshop for invaluable support concerning technical and mechanical problems at the department, Luise Schedl for her support concerning the students' practical course and for the excellent photographic work at the SEM, Petra Neubarth for continual support with all administrative issues and the disposal of the office supplies and Christiane Blaha for the reliable procurement of chemicals and other materials, also for the students' practical courses.

Above all, I am in debt of my mother Helga and her husband Peter, my grandmother Anni, my beloved girlfriend Sonja, and my dear friends Jens and Sebastian for encouragement and their continuous support during all the years.

Table of Contents

1	Introduction	1
2	Proteins	5
2.1	Amino Acids	5
2.2	Structure	6
2.2.1	Primary structure	6
2.2.2	Secondary structure	7
2.2.3	Tertiary structure	11
2.2.4	Quaternary structure	12
3	Spray Drying	13
3.1	Atomisation	15
3.1.1	Two-fluid nozzles	15
3.1.2	Pressure nozzles	16
3.1.3	Rotary atomisers	18
3.1.4	Ultrasonic nozzles	19
3.2	Droplet Drying	20
3.3	Particle separation	22
3.4	Particle size & morphology	24
3.5	Spray drying of proteins	25
3.5.1	Adsorption	25

3.5.2	Shearing stress	27
3.5.3	Thermal stress	27
3.5.4	Dehydration stress	28
3.5.5	Stabilization strategies	29
4	Fourier-Transform Infrared Spectroscopy	31
4.1	History	31
4.2	Instrumentation	33
4.3	Processing a protein spectrum	38
4.3.1	Amide vibrations	38
4.3.2	Secondary structure assignment	40
4.3.3	Fourier Self-Deconvolution	41
4.3.4	Second derivative spectra	43
4.3.5	Gaussian curve fitting	46
4.4	Correlation coefficient	47
4.4.1	Circular Dichroism	48
5	Materials & Methods	51
5.1	Materials	51
5.1.1	Poly-L-lysine	51
5.1.2	Myoglobin	52
5.1.3	α -Casein	53
5.1.4	Adjuvants & Reagents	55
5.2	Methods	55
5.2.1	Spray Drying	55
5.2.2	Vaporisation into air	56
5.2.3	FT-IR	56
5.2.4	SEM	58

6 Results & Discussion	59
6.1 Poly-L-lysine	59
6.1.1 Spray drying of pure poly-L-lysine	59
Particle morphology	72
6.1.2 Spray drying of poly-L-lysine with trehalose	72
Particle morphology	100
6.1.3 Spray drying of poly-L-lysine with polysorbate 80	102
Particle morphology	109
6.1.4 Vapourisation of poly-L-lysine	109
6.2 Myoglobin	112
6.2.1 Spray Drying of pure myoglobin	112
Particle morphology	115
6.2.2 Spray drying of myoglobin with trehalose	115
Particle morphology	120
6.2.3 Spray drying of myoglobin with polysorbate 80	126
Particle morphology	130
6.3 α -Casein	134
6.3.1 Spray Drying of pure α -casein	134
Particle morphology	137
6.3.2 Spray drying of α -casein with polysorbate 80	137
Particle morphology	141
7 Conclusions	147
8 Zusammenfassung	151
Bibliography	155
List of Tables	167
