

Concepts and Technologies for Pervasive Games

A Reader for Pervasive Gaming Research vol. 1

The cover artwork was contributed by the Leipzig based artist Sascha Nau. It follows the notion of the world as a game board and illustrates the fundamental interplay of virtual and physical worlds in Pervasive Games. The physical, tangible reality of our everyday lives is shown as mostly grey and dull, passer-bys without access to the virtual dimension of Pervasive Games appear featureless and black. They sadly move through the scenery, unaware of the colorful and exciting virtual domain that pervades our physical reality. Being part of a Pervasive Game, a mighty dragon moves through the streets in the virtual domain, challenging a group of players in the front of the scene. Unlike the other physical persons, these players are not confined to the physical reality, but act as an interface between the virtual and the physical domain, unifying the colorful details of the virtual and the tangible nature of physical world. They are the future innovators this book was written for. The artist can be contacted at www.snau.net.

Table of Contents

5 - 10	Towards the Emergence of a New Application Domain C. Magerkurth, C. Röcker
11 - 38	Classifying Pervasive Games: On Pervasive Computing and Mixed Reality S. Hinske, M. Lampe, C. Magerkurth, C. Röcker
39 - 66	Understanding and Creating the Play Experience T. Nilsen
67 - 90	Pervasive Game-Play: Theoretical Reflections and Classifications B. K. Walther
91 - 126	Pervasive GameFlow: A Validated Model of Player Enjoyment in Pervasive Gaming K. Jegers
127 - 152	Geogames – Integrating Edutainment Content in Location-Based Games P. Kiefer, S. Matyas, C. Schlieder
153 - 178	EQUIP2: A Platform for Mobile Phone-Based Game Development C. Greenhalgh, S. Benford, A. Drozd, M. Flintham, A. Hampshire, L. Oppermann, K. Smith, C. von Tycowicz
179 - 206	Sensors for Novel UIs in Pervasive Gaming P. Holleis, A. Schmidt, M. Kranz
207 - 230	Using Visual Markers for Embodied Interaction in Handheld Augmented Reality Games M. Rohs
231 - 264	ChairIO – The Chair-Based Interface S. Beckhaus , K. J. Blom, M. Haringer
265 - 290	The TVViews Table for Storytelling and Gameplay A. Mazalek , M. Reynolds, G. Davenport
291 - 310	A Game Designer’s Guide to Augmented Reality Technology T. Nilsen
311 - 336	Using RFID to Automatically Determine the Position and Orientation of Game Objects in Tabletop Games S. Hinske, M. Langheinrich
337 - 355	The Authors
