

Clones of Partial Functions on Finite Sets

Dissertation

zur

Erlangung des akademischen Grades

doctor rerum naturalium (Dr. rer. nat.)

der Mathematisch-Naturwissenschaftlichen Fakultät

der Universität Rostock

vorgelegt von

Karsten Schölzel, geb. am 08.06.1982 in Grevesmühlen

Gutachter:

Prof. Dr. Dietlinde Lau, Universität Rostock

Prof. Dr. Klaus Denecke, Universität Potsdam

Prof. Dr. Lucien Haddad, Royal Military College of Canada

Tag der öffentlichen Verteidigung:

10. Dezember 2010

Berichte aus der Mathematik

Acknowledgements

I would like to thank everyone who made it possible for this thesis to appear.

First and foremost I owe special gratitude to my supervisor Dietlinde Lau for her high-level support in this work. She gave me very good advise, brought me into contact with leading researchers of this field and encouraged me early on to present my results at conferences and publish the results. Additionally her book “Function Algebras on Finite Sets” was and is one of the most important sources for my work.

I thank my colleagues Lucien Haddad (Kingston), Klaus Denecke (Potsdam), Masahiro Miyakawa (Tsukuba), Hajime Machida (Tokyo) and many others for their input to my work and the possibilities to present my work.

I also thank the University of Rostock and especially the Institute of Mathematics for the opportunity to do research as well as gain experience in teaching mathematics to undergraduate students of different disciplines. Furthermore it was a pleasure to work with everyone including very interesting discussions. Special thanks go to Matthias Böhm, Konrad Sperfeld and Tobias Strauß with whom I shared the office.

Last but not least I wish to thank my family and my friends, inside and outside the university. I am indebted to Andi and Süne for introducing me to juggling and improvisation theater, respectively, and the friends I got to know through these hobbies. These helped me to cope with this thesis in the last two years. Special thanks to Rike and Ela for their personal support.

Contents

1	Introduction	1
2	Basics	7
2.1	Partial Functions	7
2.2	Operations on $\tilde{P}_k$	8
2.3	Function Algebras and Clones	9
2.4	Partial Functions via Domains	10
2.5	One-Point Extension	11
3	Galois Theory	13
3.1	Relations	14
3.2	Preserving of Relations; pPol, pInv	15
3.3	Diagonal Relations	16
3.4	Elementary Operations on $\hat{\mathcal{R}}_k$	16
3.5	Some Operations on $\tilde{\mathcal{R}}_k$ Derivable from the Elementary Operations	18
3.6	Subfunctions and Strong Clones	21
3.7	Relation Algebras and Co-Clones	22
3.8	Galois Connection	22
3.9	The Relations χ_n and $G_n(A)$	25
3.10	The Operator Γ_A	28
3.11	Galois Theory for Partial Function- and Relation-Algebras	28

4	Representation Lemma of Romov	31
4.1	Definitions and Properties	31
4.2	Forcing Relations	33
4.3	Representations	35
4.4	Implications	41
4.5	Representation Lemma of Romov	42
5	Characterization of Maximal Partial Clones	51
5.1	The Maximal Partial Clone $P_k \cup C_\infty$	52
5.2	Definitions	53
5.3	Characterization by Haddad and Rosenberg	54
6	Number of Maximal Partial Clones	57
6.1	Different Relations – Different Partial Clones	58
6.2	Shortcuts for Finding Coherent Relations	61
6.3	Other Completeness Criteria	64
6.4	Conclusion	66
7	Uniqueness of Minimal Covering of Maximal Partial Clones	67
7.1	Minimal Covering	69
7.2	Some Definitions	69
7.3	A Product of Functions	71
7.4	Some Simple Cases	73
7.5	Sorting the Minimal Coverings	76
7.6	Uniqueness of the Minimal Covering	86
7.7	Conclusion	96
8	Intervals of Partial Clones	97
8.1	Definitions	98
8.2	The Interval $\mathcal{I}_2(S \cap T)$	101
8.3	The Partial Clones of $\mathcal{I}_2(S \cap T)$	104
	Bibliography	113

Nomenclature	121
---------------------	------------

Index	125
--------------	------------

A Coherent relations	127
-----------------------------	------------

A.1 Program to generate the list of coherent relations	127
--	-----

A.2 Lists of coherent relations for $k \in \{2, 3\}$	139
--	-----

B The interval $\mathcal{I}_2(S \cap T)$	141
--	------------

B.1 Program to generate the interval $\mathcal{I}_2(S \cap T)$	141
--	-----

B.2 List of elements of $\mathcal{I}_2(S \cap T)$	145
---	-----
