Conference on Industrial Computed Tomography (ICT) 2012

19th – 21th September 2012

Sessions

Non-destructive Testing and 3D Materials Characterisation

- Keynote
- Composites and Polymers
- Metallic Materials
- Visualisation and Simulation
- CT-instrumentation and Correction Methods

Dimensional Measurement

- Keynote
- Dimensional Measurement 1 – Uncertainty Evaluation
- Dimensional Measurement 2 – Measurement Parameters
- Dimensional Measurement 3 and Special Applications

Poster session

- Analysis and Algorithms
- Dimensional Measurement
- CT-instrumentation and Others

Program committee

- Johann Kastner (FH OÖ, Wels/AT)
- Gerhard Aufrecht (ÖGfZP, Vienna/AT)
- Markus Bartscher (PTB, Brunswick/DE)
- Andras Borbely (ENSMSE, Saint-Étienne/FR)
- Simone Carmignato (Univ. of Padua/IT)
- Wim Dewulf (Leuven Engineering College, Leuven/BE)
- Alexander Flisch (EMPA, Dübendorf/CH)
- Eduard Gröller (TU Vienna/AT)
- Bernhard Illerhaus (BAM, Berlin/DE)
- Stefan Kasperl (FHG-EZRT, Fürth/DE)

Preface

The industrial conference on computed tomography 2012 in Wels/Austria is the continuation of two precursor conferences:

- Industrielle Computertomografietagung, Wels, Austria, 26.-27. February 2008, Proceedings: ISBN 978-3-8322-6949-4, Shaker Verlag, Aachen (2008).
- Industrielle Computertomografietagung, Wels, Austria, 28.-30. September 2010, Proceedings: ISBN 978-3-8322-9418-2, Shaker Verlag, Aachen (2010).

Industrial X-ray computed tomography (CT) is a method whose relevance has increased more and more because of its great advantages. CT is a non-destructive method for measuring components 3-dimensionally in order to find hidden errors (e.g. shrink-hole, cracks, inclusions, pores, etc.) in the depth of the material and to determine physical variables like porosity and density. CT allows the inspection and measurement of hidden and inaccessible specimen characteristics, which is not possible with other techniques. Due to the increasing dispersion of industrial CT, the method development and application areas are being spurred on at a fast pace. Currently there are more than 30 CT-device manufactures all over the world. Most of them can be found in the scientific program or at the industrial fair of this conference. CT-devices with prices ranging from EUR 60,000 to more than a million EUR can be delivered for a broad variety of applications. An overview of CT-instrumentation companies can be found on www.3dct.at.

The presentations of this conference will give insight on the newest developments as well as the established methods. Within this conference the current state-of-the-art and new developments in the following areas will be presented:

- CT for non-destructive testing of metals, plastics, composites, ceramics and other materials
- Application of CT in automotive-, aerospace- and material industry
- CT as a tool for the development of new materials and components
- CT for 3D material characterisation
- Geometry determination with macro- and micro-CT
- Initial sampling inspection and reverse engineering
- Evaluation and visualisation of CT data
- New algorithms und software tools for the evaluation and visualisation of CT data
- Correction and filter methods for the improvement of CT results
- Quantitative evaluation of CT data
- Standardisation of CT (e.g. VDI/VDE-GMA: Technical committee “Computed Tomography for Metrology”)
- New CT methods for high resolution, energy dispersive and fast CT
- New developments in CT instrument technology including X-ray detectors and sources

On the basis of submitted abstracts the 18 members of the scientific program committee have developed the scientific program (talks and posters) for the iCT2012. We thank all members for their active support and work.

- Johann Kastner (FH OÖ, Wels/AT)
- Gerhard Aufricht (ÖGfZP, Vienna/AT)
- Markus Bartscher (PTB, Brunswick/DE)
- Andras Borbely (ENSMSE, Saint-Étienne/FR)
- Simone Carmignato (Univ. of Padua/IT)
- Wim Dewulf (Leuven Engineering College, Leuven/BE)
- Alexander Flisch (EMPA, Dübendorf/CH)
- Eduard Gröller (TU Vienna/AT)
- Bernhard Illerhaus (BAM, Berlin/DE)
- Stefan Kasperl (FHG-EZRT, Fürth/DE)
- Javier Llorca (iMdea, Madrid /ES)
- Eric Maire (INSA de Lyon/FR)
- Frank Mücklich (Univ. Saarbrücken/DE)
- Reinhold Oster (Eurocopter, Munich/DE)
- Guillermo C. Requena (TU Vienna/AT)
- Ion Tiseanu (INFLPR, Bucharest/RO)
- David Vavrik (CTU, Prague/CZ)
- Valery L. Vengrinovich (Institute of Applied Physics, Minsk/BY)

The contributions accepted by the scientific program committee are published in the underlying conference proceedings and will be available online on www.ndt.net in a few months.

We thank our co-organizers, who supported us strongly especially in the promotion of this conference:

- ÖGfZP (Österreichische Gesellschaft für zerstörungsfreie Prüfung)
- DGZfP (Deutsche Gesellschaft für zerstörungsfreie Prüfung)
- SGZP (Schweizer Gesellschaft für zerstörungsfreie Prüfung)
- DGM-Arbeitskreis Tomografie (Deutsche Gesellschaft für Materialkunde)

We are also very thankful to our industrial sponsors (CT-device manufacturers, X-ray source manufacturers, detector manufacturers and software manufacturers), who support the iCT2012 financially and exhibit their latest developments at the fair accompanying the talks:

- Carl Zeiss IMT GmbH, Oberkochen/DE
- GE Sensing & Inspection Technologies GmbH, Wunstorf/DE
- Excillum AB, Kista/SE
- Hamamatsu Photonics Deutschland GmbH, Herrsching/DE
- Nikon Metrology NV, Leuven/B
- North Star Imaging Europe, Paris/FR
- RayScan Technologies GmbH, Meersburg/DE
- Volume Graphics GmbH, Heidelberg/DE
- VSG - Visualization Sciences Group, Düsseldorf/DE
- Wenzel Volumetrik GmbH, Singen/DE
- Werth Messtechnik GmbH, Giessen/DE
- Yxlon International GmbH, Hamburg/DE

The iCT2012 conference was also supported by the K-project for non-destructive testing and tomography. We are thankful to the Government of Upper Austria and the comet program of the FFG (Austrian research promotion agency) for their financial support.

Sincere thanks are given to the local organizing committee, in particular to DI(FH) Michael Reiter and to Mag. Elena Spitzer, who had a lot of work concerning the organization of the proceedings and the conference in general.

We wish you many new ideas, fruitful discussions and in particular a pleasant stay at the conference and in Wels. Our next "Conference on Industrial Computed Tomography" will be held in 2014 and we would be delighted to see you there again.
