

INSTITUTE OF AGRICULTURAL ENGINEERING

Universität Hohenheim

Chair in Agricultural Engineering in the Tropics and Subtropics

Prof. Dr. J. Müller

**Characterization of physico-chemical properties of
Jatropha curcas L. and optimization of mechanical oil extraction
and sedimentation**

Dissertation

Submitted in fulfillment of the requirements for the degree

„Doktor der Agrarwissenschaften“

(Dr. Sc. agr. / Ph.D. in Agricultural Sciences)

to the

Faculty of Agricultural Sciences

presented by

Shkelqim Karaj

from Tirana, Albania

2014

This thesis was accepted as a doctoral dissertation in fulfillment of the requirements for the degree “Doktor der Agrarwissenschaften” by the Faculty of Agricultural Sciences at Universität Hohenheim on 26.07.2013.

Date of oral examination: 17.12.2013

Examination Committee

Prof. Dr. Joachim Müller	(Supervisor and Reviewer)
Prof. Dr. Klaus Becker	(Co-Reviewer)
Prof. Dr. Dr. h. c. mult. Karlheinz Köller	(Additional examiner)
Prof. Dr. Jens Wünsche	(Deputy of the Dean)

This work was accomplished within the framework of BMBF project Nr. 0330799A “Optimization of de-shelling and oil extraction of *Jatropha curcas* L. for direct use in Plant oil stoves“ during my occupation at Institute for Agricultural Engineering of Universität Hohenheim.

Schriftenreihe des Lehrstuhls für Agrartechnik in den Tropen und
Subtropen der Universität Hohenheim
herausgegeben von Prof. Dr. Joachim Müller

Band 07/2014

Shkelqim Karaj

**Characterization of physico-chemical
properties of *Jatropha curcas* L. and optimization
of mechanical oil extraction and sedimentation**

ACKNOWLEDGMENTS

This work was accomplished within the framework of BMBF project Nr. 0330799A during my occupation at Institute for Agricultural Engineering of Universität Hohenheim. A special gratitude to my supervisor, Prof. Dr. Joachim Müller for his continuous input, advice, guidance and patience, to Prof. Dr. Klaus Becker and Prof. Dr. Harinder Makkar for their guidance within the research project and the staff members of the Institute workshop for their dedicated work and assistance in constructing all the experimental installations, by name Klaus Lutz, Jürgen Bernhard, Lulzim Kuqi, Reinhold Ruess, Siegfried Kömpf, Jürgen Kraft, Winfried Okraffka, Harry Hübinger, Ulrike Werner and Ingrid Hadam.

Thanks to my colleagues at Institute for Agricultural Engineering for effective and pleasant teamwork: Martin Kratzeisen, Nikica Starcevic, Torsten Rehl, Dimitrios Argyropoulos, Martin Böhner, Isabel Barfuss, Marcus Nagle, Claudia Maurer, Klaus Meissner, Katrin Pütz, Marcelo Precoppe, Giuseppe Romano and Shamaila Zia. Also special thanks to the laboratory staff for their help on analyzing large numbers of samples at high reliability and accuracy: Sarah Fleischmann, Ingrid Amberg, Dorothea Hirschbach-Müller, Herrmann Baumgärtner and Peter Claxton.

Thanks to my students Roxana, Paula, Dirk, David, Philipp, for their help on conducting the experiments and delivering reliable data, which made it possible to accomplish this dissertation. Thanks to my friends at Universität Hohenheim for the spare time we shared in many activities such as sport, parties and cultural events, Enzo, Andres, Micha, Pizza, Mathias, Thias and Baz, Torsten, Christian, Yannik and many more who made my stay in Germany enjoyable.

Finally, many thanks to my family, mother and father, Fatbardha, Dhurata, Lindita and Leonard Karaj for their immense support through all these years, they believed in my success and were proud of my achievements. Gratitude to my Albania friends in Germany and Albania for their support and motivation as well as my Albanian Professors who made possible my studies in Germany and trusted in my work.

Thank you all for the support.

Shkelqim Karaj (Jimmy)

Contents

1	GENERAL INTRODUCTION.....	1
1.1	<i>Jatropha curcas</i> L.	1
1.2	<i>Jatropha curcas</i> L. as source of renewable Energy	3
1.3	Problem statement	5
1.4	Aim and structure of study	7
1.5	References	8
2	PART I: DETERMINATION OF PHYSICAL, MECHANICAL AND CHEMICAL PROPERTIES OF SEEDS AND KERNELS OF <i>JATROPHA CURCAS</i> L.	14
2.1	Abstract	14
2.2	Introduction	15
2.3	Materials and methods	16
2.3.1	Material and sample selection.....	16
2.3.2	Terminal velocity of <i>J. curcas</i> seeds.....	17
2.3.3	Physical properties of <i>J.curcas</i> seeds and kernels	19
2.3.4	Mechanical properties of <i>J.curcas</i> seeds and kernels	22
2.3.5	Chemical properties of <i>J.curcas</i> seeds and kernels	24
2.4	Results and discussion.....	24
2.4.1	Physical properties of seeds and kernels.....	24
2.4.2	Geometric characteristics.....	25
2.4.3	Mechanical properties of seeds and kernels.....	29
2.4.4	Chemical properties of seeds and kernels	34
2.5	Conclusions	37
2.6	References	38
3	PART II: OPTIMIZING MECHANICAL OIL EXTRACTION OF <i>JATROPHA CURCAS</i> L. SEEDS WITH RESPECT TO PRESS CAPACITY, OIL RECOVERY AND ENERGY EFFICIENCY	42
3.1	Abstract	42
3.2	Introduction	42
3.3	Material and Methods.....	44
3.3.1	<i>J. curcas</i> seed material	44
3.3.2	Mechanical screw press Komet D85-1G	44
3.3.3	Independent and dependent variables	45
3.3.4	Experimental procedure	48
3.4	Results and Discussions	50
3.4.1	Temperature generation during pressing process	50
3.4.2	Oil recovery optimization	53
3.5	Conclusions	57
3.6	References	58

4 PART III. EFFECT OF CONTAINER DEPTH AND SEDIMENTATION TIME ON QUALITY OF <i>JATROPHA CURCAS</i> L. OIL	61
4.1 Abstract	61
4.2 Introduction	62
4.3 Materials and methods	63
4.3.1 Material and oil extraction	63
4.3.2 Sedimentation systems for partial clarification	63
4.3.3 Particle size and chemical properties	65
4.3.4 Statistical analysis	67
4.4 Results and discussion	67
4.4.1 Partial clarification by sedimentation	67
4.4.2 Particle size distribution	71
4.4.3 Chemical properties	71
4.5 Conclusion	78
4.6 Reference.....	80
5 CONCLUDING DISCUSSION	84
5.1 Engineering properties of <i>Jatropha curcas</i> L.	84
5.2 Mechanical extraction of <i>Jatropha curcas</i> L. seeds	86
5.3 Oil quality determination	87
5.4 Outlook.....	88
5.5 References	89
6 SUMMARY	93
7 ZUSSAMENFASUNG	96
