

Synthesis of Gold Nanoparticles via the Chemical Reduction Methods

Von der Fakultät für Georessourcen und Materialtechnik der
Rheinisch -Westfälischen Technischen Hochschule Aachen

zur Erlangung des akademischen Grades einer

Doktorin der Ingenieurwissenschaften

genehmigte Dissertation

vorgelegt von

M.Sc. Jingyue Zhao

aus Luoyang, China

Berichter: Univ.-Prof. Dr.-Ing. Dr.h.c. (UA) Karl Bernhard Friedrich

Univ.-Prof. Dr. rer. nat. Ulrich Simon

PD Dr.-Ing. Srecko Stopic

Tag der mündlichen Prüfung: 03. November 2016

Acknowledgement

This thesis was written during my time as research assistant at the IME Institute of Process Metallurgy and Metal Recycling of the RWTH Aachen University. I appreciate the Chinese Scholarship Council (CSC) for financing my stay in Germany between December 2011 and November 2015.

My special gratitude belongs to Univ.-Prof. Dr.-Ing. Dr. h.c. Karl Bernhard Friedrich, the managing director of IME, for giving me the opportunity for a doctorate, the professional mentoring and the provided human support during my time at IME.

I would like to express my sincere thanks to Prof. Dr. Ulrich Simon and Priv. Doz. Dr.-Ing. habil. Srecko Stopic for their willingness to take the second and the third examiners of my thesis. I thank Dr.-Ing Reinhard Fuchs, chief engineer of IME for the organization support during my time at IME.

I am very much obliged to Dr.-Ing. Weiping Hu from IMM Institute of Physical Metallurgy and Metal Physics of the RWTH Aachen University, for kindly provided support using the Transmission electron microscopy.

I thank all staff of the IME for the pleasant, productive and memorable working environment. On behalf of the scientific staff, I call my colleges for the many technical discussions and human support. My special thanks goes to the technical and administrative team of IME, especially Friedrich Rosen and Debora Schnabel. I also thank the entire chemistry laboratory at IME, headed by Paul van der Heiden for the conducted chemical analysis of various samples. Furthermore, I would like to thank my student assistance Chongyang Chen and Zhaowan Xie for their valuable work and very good cooperation.

In particular, I appreciate my beloved Shiyao for the affectionate support, as well as my parents for their kind support. And I thank my little son, who has given me a lot of motivation to finish my thesis.

Jingyue Zhao, Aachen, May 2015

Danksagung

Die vorliegende Arbeit entstand während meiner Zeit als Forschungsassistentin am IME Metallurgische Prozesstechnik und Metallrecycling der RWTH Aachen University. Ich möchte dem Chinese Scholarship Council (CSC) für die Finanzierung meines Aufenthalts in Deutschland zwischen Dezember 2011 und November 2015 danken.

Mein besonderer Dank gilt dem Institutsleiter Univ.-Prof. Dr.-Ing. Dr. h.c. Karl Bernhard Friedrich für die Möglichkeit zur Promotion, die professionelle Betreuung und die menschliche Unterstützung in meiner Zeit am IME.

Mein Dank gilt ebenso Prof. Dr. Ulrich Simon and Priv. Doz. Dr.-Ing. habil. Srecko Stopic für die Bereitschaft die Zweit- und Drittprüfung meiner Arbeit zu übernehmen. Ich danke Dr.-Ing Reinhard Fuchs, dem Oberingenieur des IME, für die Organisationsunterstützung während meiner Zeit am IME.

Ich bin Dr.-Ing. Weiping Hu vom IMM Institut für Metallkunde und Metallphysik der RWTH Aachen University sehr verbunden für die Hilfe bei der Benutzung des Transmissionselektronenmikroskops.

Ich danke allen Mitarbeitern des IME für das angenehme, produktive und erinnerungsreiche Arbeitsumfeld. Meinen Kollegen in der Forschung danke ich für viele technische Diskussionen und ihr menschliche Unterstützung. Mein besonderer Dank geht an das technische und administrative Team des IME, sowie an das gesamte Chemie-Labor am IME, geleitet durch Paul von der Heiden, für die chemische Analyse verschiedener Proben. Weiterhin möchte ich meinen Abschlussarbeitern oder Hilfswissenschaftlern Chongyang Chen und Zhaowan Xie für ihre wertvolle Arbeit und sehr gute Kooperation danken.

Besonders schätze ich die liebevolle Unterstützung durch meinen geliebten Shiyao und meinen kleinen Sohn Muchen, sowie die seelische Unterstützung meiner Eltern.

Jingyue Zhao, Aachen, Mai 2015

Contents

Extended Abstract	IV
1 Introduction.....	- 1 -
2 State of the art	- 3 -
2.1 Gold nanoparticle and its properties	- 3 -
2.1.1 Introduction and motivation.....	- 3 -
2.1.2 Electronic features.....	- 6 -
2.1.3 Optical properties	- 7 -
2.2 Applications, market potential and research interest.....	- 10 -
2.2.1 Gold nanoparticles for biotechnology and medicine.....	- 10 -
2.2.2 Nano gold catalyst	- 13 -
2.2.3 Market potential.....	- 15 -
2.3 Chemical synthesis of gold nanoparticles - State of the art	- 18 -
2.3.1 Priority of the chemical method to physical method	- 18 -
2.3.2 The Turkevich process – reduction using citrate	- 20 -
2.3.3 The Brust process.....	- 23 -
2.3.4 The Faraday process	- 26 -
2.3.5 Benchmark: decision for citrate.....	- 27 -
2.4 Citrate reduction method	- 29 -
2.4.1 Formation mechanism.....	- 29 -
2.4.2 Particle ripening.....	- 38 -
2.5 Post treatment investigations	- 39 -

2.6	Characterization methods	- 44 -
2.7	Summary of state of the art	- 47 -
3	Experimental methodologies	- 49 -
3.1	Experimental plan.....	- 49 -
3.2	Synthesis process via citrate reduction	- 51 -
3.2.1	Experimental method	- 51 -
3.2.2	Experiments with different citrate concentration	- 52 -
3.2.3	Synthesis via increasing Au concentration	- 54 -
3.2.4	Synthesis via different temperature and pressure	- 56 -
3.3	Synthetic procedure with reductant NaBH ₄	- 58 -
3.4	Post treatment for the citrate stabilized gold nanoparticles.....	- 59 -
3.4.1	Experimental setup for dialysis process.....	- 59 -
3.4.2	Experimental setup for diafiltration process	- 60 -
3.5	Characterization	- 64 -
4	Results and discussion	- 67 -
4.1	The citrate reduction method	- 67 -
4.1.1	Influence of citrate concentration	- 67 -
4.1.2	Influence of Au concentration	- 72 -
4.1.3	Influence of the reaction temperature	- 76 -
4.1.4	Synthesis process model.....	- 81 -
4.1.5	Assessment of the experimental bench scale results for citrate reduction	- 84 -

4.2	Study of the synthetic procedure with reductant NaBH_4	- 85 -
4.3	Scale up of the process	- 87 -
4.3.1	Synthesis process of the citrate reduction method	- 87 -
4.3.2	Synthesis process of the NaBH_4 reduction method	- 91 -
4.4	Investigation of post treatment	- 95 -
4.4.1	Dialysis method	- 95 -
4.4.2	Diafiltration method	- 97 -
4.4.3	Gold nanoparticles stability status during the dialysis process	- 98 -
4.4.4	Assesment of the post treatment studies	- 103 -
5	Summary and outlook	- 104 -
6	References	- 107 -
7	Appendix	- 116 -
