

SBSC 2018

8th Sensor-Based Sorting & Control

Thomas Pretz,
Hermann Wotruba,
Alexander Feil (eds.)

SECOPTA

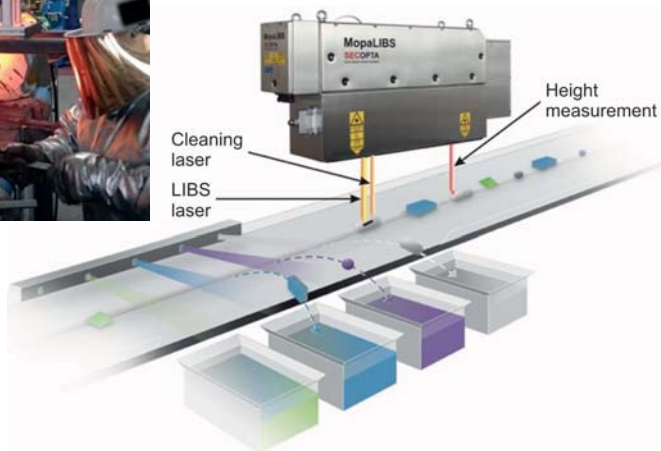

laser based sensor systems

Industrial LIBS Analyzers for Mining, Production, Recycling, Laboratory

Enables High Purity Sorting

- Inline, without waiting times
- Analyzing high volume flows
- Designed for harsh environments
- Measures all surfaces
- Maximize value of raw material by precision sorting

**Thomas Pretz,
Hermann Wotruba,
Alexander Feil (eds.)**

8th Sensor-Based Sorting & Control

March 6th - 7th, 2018, Aachen

Scientific Direction:

Prof. Dr.-Ing. Thomas Pretz, Prof. Dr.-Ing. Hermann Wotruba and Dr.-Ing. Alexander Feil (eds.)

A joint conference of Department of Processing and Recycling (I.A.R.) and the Unit of Mineral Processing (AMR) of RWTH Aachen University as well as Aachen Know-How Centre Resource Technology (AKR) and RWTH International Academy. March 06. – 07., 2018 in Aachen, Germany

Content

High volume sensor-based ore sorting solutions	13
Christopher Robben, TOMRA Sorting GmbH	
Evaluation of sensor based sorting technology for the pre-concentration of Sn-Nb-Ta-Y-REE ore from Pitinga, Brazil	21
Carlos Petter, Federal University of Rio Grande do Sul (UFRGS)	
Operation of LIBS elemental analyzer for inline volume flow analysis of minerals in mining and steel industry	25
Amit Ahsan, SECOPTA analytics GmbH	
Next generation urban mining – Laser-based sensing and sorting of electronic scrap	29
Sven Conneman, Fraunhofer Institute for Laser Technology	
Non-ferrous scrap metals classification by hyperspectral and multi-energy X-ray transmission imaging	39
Lorraine Braibant, University of Liège, Faculty of Applied Sciences	
Towards smart e-waste demanufacturing systems exploiting multisensor vision system capabilities	49
Nicoletta Picone, ITIA-CNR - Istituto di Tecnologie Industriali e Automazione	
Characterise-to-sort: Advanced solid waste characterisation by multi-sensor data	61
Roeland Geurts, Sustainable Materials Managment, VITO	
RhoVol – a new method for rapid particle density analysis	63
Anthon Voight, De Beers Technologies South Africa	
Application of Area-Scan Sensors in Sensor-Based Sorting	73
Georg Maier, Fraunhofer Institute of Optronics	

Large scale waterjet printing for the ultra-fast high definition sensor sorting technology Pingping Wen, Delft University of Technology	83
Application of Optical Sensor-Based Sorting for Preconcentration of Seafloor Massive Sulphides Klaus Hahn, AMR - Unit of Mineral Processing, RWTH Aachen University	87
Quantitative Chemical Imaging in the Industry Matthias Kerschhaggl, EVK DI Kerschhaggl GmbH	95
Machine vision based measurement system for quantity and quality inspection of aggregates transported on conveyer belts Anna Bzymek, Institute of Fundamentals of Machinery, Faculty of Mechanical Engineering, Silesian University of Technology	97
Evaluation of bulk and particle sensor-based sorting strategies for the New Afton block caving operation Stefan Nadolski, NBK - Institute of Mining Engineering, The University of British Columbia	103
Analysis of intra-particle heterogeneity to assess XRF sorting Santiago Seiler, NBK - Institute of Mining Engineering, The University of British Columbia	105
Assessing Ore Heterogeneity for Bulk Sorting at the New Afton Copper Mine Bern Klein, NBK - Institute of Mining Engineering, The University of British Columbia	107
Methodology for the evaluation of ore sorting potential: approach in CIS Alexey Kobzev	111
Capabilities of the newly developed XRF-Sensor for process analysis - XRFLine Günter Buzanich, LLA Instruments GmbH	117
Short wave infrared hyperspectral imaging based procedures for quality control of recycled aggregates from end-of-life concrete Silvia Serranti, Department of Chemical Engineering, Materials & Environment, Sapienza University of Rome	119

An evaluation of plastic classification techniques using Hyperspectral Near-Infrared Imaging	125
Marcel Bosling, I.A.R. - Department of Processing and Recycling, RWTH Aachen University	
Hyperspectral imaging applied to quality control of end-of-life plastics waste	133
Giuseppe Bonifazi, Department of Chemical Engineering, Materials & Environment, Sapienza University of Rome	
On-line analysis for the classification of metal and plastic scrap using Laser-induced breakdown spectroscopy and machine learning algorithms	139
Jonas Petersson, Swerea KIMAB	
Drill Core Analysis by Neutron Activation (Drill Core Analyzer “CorA”)	143
Marius Hirsch, AiNT - Aachen Institute for Nuclear Training GmbH	
Demonstration of a Magnetic Resonance Analyser for Bulk Copper Ore Sorting	151
David Miljak, Commonwealth Scientific and Industrial Research Organisation (CSIRO)
