## List of Contents

1. Hot–cold living. Problems and scope of study	6
2. Climate, energy consumption and economic factors	7
3. How to save energy?	7
4. High-Tech or Low-Tech	8
5. How can energy saving and production be achieved with low-tech methods?	9
6. Heating and cooling by sun and wind: low-tech	10
6.1. Heating	10
6.2. Cooling	12
7. Wind for energy generation	14
8. Light and space	16
9. Design: shapes and facades	18
10. Green areas, gardens	20
11. A new architecture	21
12. Prototypes for individual buildings	21
12.1. Form and space	22
12.2. Light and space	24
12.3. Cross ventilation, sun protection, heat generation	26
12.4. Construction, material, costs	28
12.5. Water supply	29
13. Settlement structure and mobility	30
14. Conclusion	33
15. Further projects on Desert Houses (2011-2013) at the German University in Cairo and Stuttgart University	33
16. Excursion:	
Visual connections in space, settlement and mobility	36
16. 1. Structure and circulation	38
16. 2. Structure and spatialization	39
16. 3. Space and light	40
16. 4. Prototype for a settlement unit	42
16. 5. Prototypes for a research building on the campus of the German University in Cairo	50
17. Annex	54
17.1. Student works	56
17.2. Examples for protection against sun radiation	57
18. Project participants	58
19. Literature	59
