Editors' Preface

Medical Geography and Health Geography locate themselves at the interdisciplinary interface of medicine, public health and geography. Through crosscutting issues, they connect and combine human, physical and regional geographies in interdisciplinary ways. The *Geographical Health Research Series* offers an extensive and independent publication platform for a topic receiving increasing attention in modern research, teaching and practise in the German-speaking world. High-quality studies from all branches of Medical Geography and Health Geography are collated in this series. As well as disease ecology, this series will publish scientific papers dealing with space-related aspects of healthcare, health and development, salutogenesis and pathogenesis, spatial manifestations of social and cultural dimensions of health and disease, both in German and in English. All subjects in this series are bound by one specific characteristic: the geographical dimension in its widest sense, be that an Euclidean space or a meaningful place.

Jürgen Schweikart, Berlin

Table of Contents

List of Figures.....	XI
List of Tables	XV
List of Abbreviations	XVII
1 Introduction	1
1.1 Motivation	3
1.2 Objectives.....	4
1.3 Structure of the thesis	5
2 Thematic context	7
2.1 Geographies of health	7
2.2 Access and utilization.....	10
2.2.1 Access	10
2.2.2 Spatial access and spatial accessibility.....	17
2.2.3 Utilization	19
2.2.4 Barriers to the utilization of health care services	21
2.2.5 Framework for the here presented study	25
2.3 GIS used for analyzing access and utilization	26
2.3.1 Euclidean distances.....	27
2.3.2 Gravity models.....	30
2.3.3 Network analysis	31
2.3.4 Cost distance algorithms	32
2.3.5 Estimations of travel times	34
3 The regional context: Rwanda	37
3.1 Geographic and climatic conditions	37
3.2 The Genocide and its consequences	39
3.3 Current administrative structure of Rwanda and its population	40
3.4 Economy and education	43
3.5 Communication and technology	44
3.6 Road network and public transport	45
3.7 The Rwandan Health Care System.....	46
3.7.1 Historical development of the health care system in Rwanda	46

3.7.2	Current Situation.....	47
3.7.3	The community level	49
3.7.4	Health insurance schemes in Rwanda	50
4	Methodology.....	55
4.1	Study area.....	55
4.1.1	Selection of the area of interest.....	55
4.1.2	Description of the study area	57
4.2	Concept of study methods.....	62
4.2.1	Questionnaires at health centers	63
4.2.2	Interviews with Experts.....	67
4.2.3	Group discussions	68
4.2.4	Registration books	69
4.2.5	Geodata.....	74
4.2.6	Data from the Health Management Information System.....	75
4.2.7	Census data.....	75
4.2.8	Dasymetric population density map	76
4.2.9	Spatial analysis.....	77
4.2.10	Modelling of catchment areas	78
5	Results: Evaluation and Discussion	91
5.1	Questionnaires at health centers	91
5.1.1	Validation of questionnaires.....	91
5.1.2	Descriptive Statistics.....	93
5.1.3	Summary by health center	103
5.2	Data collection from registration books	107
5.3	Spatial Analysis.....	114
5.3.1	Spatial distribution of questionnaire respondents.....	114
5.3.2	Spatial distribution of patients recorded from registration books.....	115
5.3.3	Spatial disparities in health center utilization.....	122
5.4	Modelling catchment areas	128
5.4.1	Dasymetric population density map	128
5.4.2	Euclidean distances.....	130
5.4.3	Cost layer based approaches.....	134
5.4.4	Huff model	138

5.4.5	Network Analysis	140
5.4.6	Distance utilization indices	144
5.4.7	Own approach: Path distance allocation.....	148
5.5	Calculation of served areas and population per health center	151
6	Health center utilization in Huye District: Conclusions.....	155
6.1	Health center choice.....	155
6.2	Modeling of catchment areas.....	157
6.3	Transferability of results	158
	References.....	161
	Interview partners	189
