# Acknowledgments

I have great appreciation for my parents in Iran and wish to thank them for all of their inspiration excellent teaching and encouragement to make me realize the magnitude of this task. I wholeheartedly dedicate this thesis to them.

I owe thanks to those from University Bremen and aib institute, who provided help along the way, made it possible in various discussions to exchange ideas, and helped me to summarize my thought. Without those technical, analytical, and personal supports, such a research would have not been possible.

Special thanks go to my doctoral thesis advisor Prof. Dr.-Ing. Franz J. Heeg, for encouraging me to accomplish this thesis and for his suggestions and constructive feedbacks during its preparation. I would also appreciate the kind dedication and support of my second supervisor Prof. Dr.-Ing. Schmauder. It was through his assistance and influence that this thesis has obtained its scientific resonance.

This dissertation would not have been completed without support and assistance of a number of people. I truly thank many colleagues, friends and industry partners, who contributed to the accomplishment of my thesis with their ideas or assistance. Specially, Dr. Andreas Lenninger, Christoph Schreblowski, Brigitte Schneider-Heeg, Marcus Mangold, Dr. Eberhard Karbe. Without all of you, such study would not easily be possible.

I wish to acknowledge the willingness and support of all leaders in German manufacturing companies to participate in this research with full enthusiasm. Certainly, the success of this thesis depended on those leaders who allowed me to study the story of their success.

I eagerly want to thank and express my love to my wife Mirjam for her understanding in challenging situations, for her patience and her support.

Finally, I would acknowledge the financial support of FAZIT-Stiftung over the years and central research fellowship of University Bremen.

I further thank all colleagues who supported me during preparation of this work and are not mentioned by name.

“Once something - anything – has to be produced, there must be rules or a system for the production of a good. The fact that the employees have understood these rules (this system) or does not have a significance influence on product quality, costs, safety and all other determining variable of success or failure.”

Toyota Motor Company, TPS

# Table of Contents

|  |             |
|--|-------------|
| <b>Table of Contents .....</b>   | <b>I</b>    |
| <b>Zusammenfassung.....</b>  | <b>IV</b>   |
| <b>Abstract.....</b>   | <b>VI</b>   |
| <b>Statutory Declaration.....</b>  | <b>VIII</b> |
| <b>Abbreviation .....</b>  | <b>IX</b>   |
| <b>1      Introduction.....</b>  | <b>1</b>    |
| 1.1    Basic Approaches.....   | 1           |
| 1.2    Object of Research.....   | 3           |
| 1.3    Gap in Literature.....  | 4           |
| 1.4    Research Questions.....   | 6           |
| 1.5    Roadmap of the Study.....   | 7           |
| <b>2      Theoretical Principles .....</b>                                       | <b>10</b>   |
| 2.1    Search Strategy .....   | 10          |
| 2.1.1    The Scope of the Review .....   | 11          |
| 2.2    Manufacturing Capabilities.....   | 11          |
| 2.2.1    Manufacturing Measures.....   | 12          |
| 2.3    Manufacturing Strategy and Basic Approaches.....                          | 14          |
| 2.3.1    Basic Elements of Lean Production .....                                 | 18          |
| 2.3.2    Socio-Technical System.....   | 23          |
| 2.4    Lean Implementation .....   | 25          |
| 2.4.1    Prerequisites of Successful Implementation .....                        | 26          |
| 2.4.2    Role of Leadership.....   | 35          |
| 2.4.3    Neuroenergetic Leadership and Organizational Development (NELOD®) ..... | 41          |
| 2.5    Chapter Summary .....   | 44          |
| <b>3      Research Design .....</b>  | <b>45</b>   |
| 3.1    Research Strategy.....  | 46          |
| 3.1.1    Qualitative Research .....  | 48          |
| 3.2    Conceptual Model.....   | 50          |

|          |   |            |
|----------|---|------------|
| 3.3      | Sample Selection.....                                 | 51         |
| 3.3.1    | Sample Building Process .....                         | 52         |
| 3.4      | Data Collection Procedures.....                       | 54         |
| 3.4.1    | Semi-Structured Interviews.....                       | 55         |
| 3.4.2    | Direct Observation.....                               | 57         |
